

## DRAFT STRATEGIES AND ACTIONS: TRACKING

*Deliverables for this project include two stand-alone documents - the Natural Heritage & Urban Forest Strategy (NH&UFS) and the Urban Forest Management Plan (UFMP). The Strategies are from the NH&UFS, while the supporting Actions are from the UFMP.*

Existing tree canopy cover (TC) by small geographic units (from City of Mississauga Urban Forest Study, 2011)

Targets are one way to track the status of the Natural Heritage System and Urban Forest in Mississauga, but they only tell part of the story. Comprehensive monitoring includes looking at how the City is progressing in terms of overall planning and management, and the degree to which the community and other stakeholders are being engaged.

STRATEGY #28: Track the status of the Natural Heritage System

STRATEGY #29: Track the status of Mississauga's urban forest

- Action #1: Adopt the three-tiered UFMP framework to implement action items and monitor their status
- Action #2: Monitor the status of the urban forest

STRATEGY #30: Report on the Status of the Natural Heritage System and urban forest every four years
