

City of Mississauga

Ward 9 – 2018 Roads Program

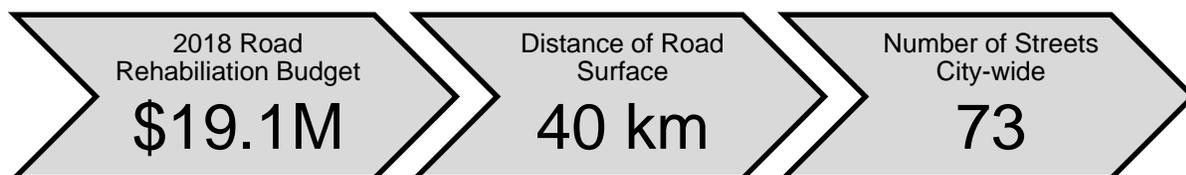

The Transportation and Works Department are pleased to provide an overview of the City's road infrastructure works planned for **2018** in **Ward 9**. A map showing the locations of these projects in the ward has been attached for ease of reference. During this year's construction season, we would like to thank you for your patience and understanding as we work to improve infrastructure all across our City.

The **Roads Capital Program** includes roadway rehabilitation, major roads improvements, bridge and culvert renewal, cycling infrastructure and sidewalk improvements, noise wall replacements, intersection improvements, and stormwater low impact development (LID) enhancements within the right-of-way (ROW).

Roadway Rehabilitation

The Roadway Rehabilitation program is focused on the renewal of the pavement, curb and sidewalk infrastructure within the roadway. Pavement renewal can range from resurfacing to the full reconstruction of roadway pavement structure. The curbs and sidewalks may also be replaced as part of the rehabilitation project if warranted by their condition. These projects are prioritized based on city-wide needs and are coordinated with other City projects, the Region of Peel, utility companies and development pressures to the extent possible and practical. The approved 2018 city-wide budget for roadway rehabilitation is \$19.1 million and includes 40 km of road surface, affecting 73 streets.

The table below summarizes the streets planned for rehabilitation in **Ward 9** this year.

Street Name	From	To	Length (m)
Surveyor Rd	Millcreek Dr	West End	392
Torquay Mews	Turner Valley Rd	North End	237
Millcreek Dr	Erin Mills Pky	Aquitaine Ave	1374
Milltower Crt	Millcreek Dr	East End	223
Arles Mews*	Montevideo Rd	End	174
Trondheim Cr*	Montevideo Rd	Montevideo Rd	295
Cherbourg Gdns*	Montevideo Rd	End	50
Total	7 Streets		2.7 km

*Indicates street was carried over from previous year.

Major Roads Improvements

Projects in the Major Roads program include new roads, road widenings, multi-modal integrations, grade separations from railway corridors, and other improvements to the major roads network. Typically, a Municipal Class Environmental Assessment (EA) study is completed for each project prior to proceeding to construction. There are no major road improvement projects underway or planned in **Ward 9** this year.

Bridge and Culvert Renewal

The Bridge and Culvert program focusses on structural rehabilitations or replacements. For structures over creeks, the Stormwater Team is consulted on needs or opportunities for hydraulic improvements to reduce flooding risks. No bridge or culvert renewal projects are planned in **Ward 9** this year.

Cycling Infrastructure

Mississauga's Cycling Master Plan has identified the needs, locations and priorities for cycling infrastructure improvements in the City. Examples include bike lanes and multi-use trails within the ROW. The following table summarizes the cycling infrastructure projects planned in **Ward 9** this year.

Street Name	From	To	Side	Length (m)
Winston Churchill Blvd	Eglinton Ave W	Erin Centre Blvd	East	603
Winston Churchill Blvd	Aquitaine Ave	Derry Rd W	East	844
Millcreek Dr	Acquitaine Ave	Derry Rd W	East	497
Totals	3 Locations			1.9 km

Sidewalk Improvements

Projects in the Sidewalk program focus on filling in gaps to improve sidewalk connections for pedestrians. The following table summarizes the new sidewalks planned in **Ward 9** this year.

Street Name	From	To	Side	Length (m)
Century Ave	Argentia Rd	Argentia Rd	North	1084

Noise Wall Replacements

Candidates for the Noise Wall Replacement program have been assessed based upon their existing condition, safety considerations, construction schedules and installation criteria. Noise scheduled for replacement are those in poor condition and which meet the installation criteria set out in Policy 09-03-03. No noise wall replacement projects are planned in **Ward 9** this year.

Intersection Improvements

The Intersection Improvement program includes funding for the treatment of intersections with the focus on improving safety, traffic flow and capacity. These improvements typically take the form of additional turn lanes to improve vehicle capacity or to support the installation of traffic signals. Intersection improvements are also constructed to reduce conflicts between pedestrians and motorists. No intersection improvement projects are planned in **Ward 9** this year.

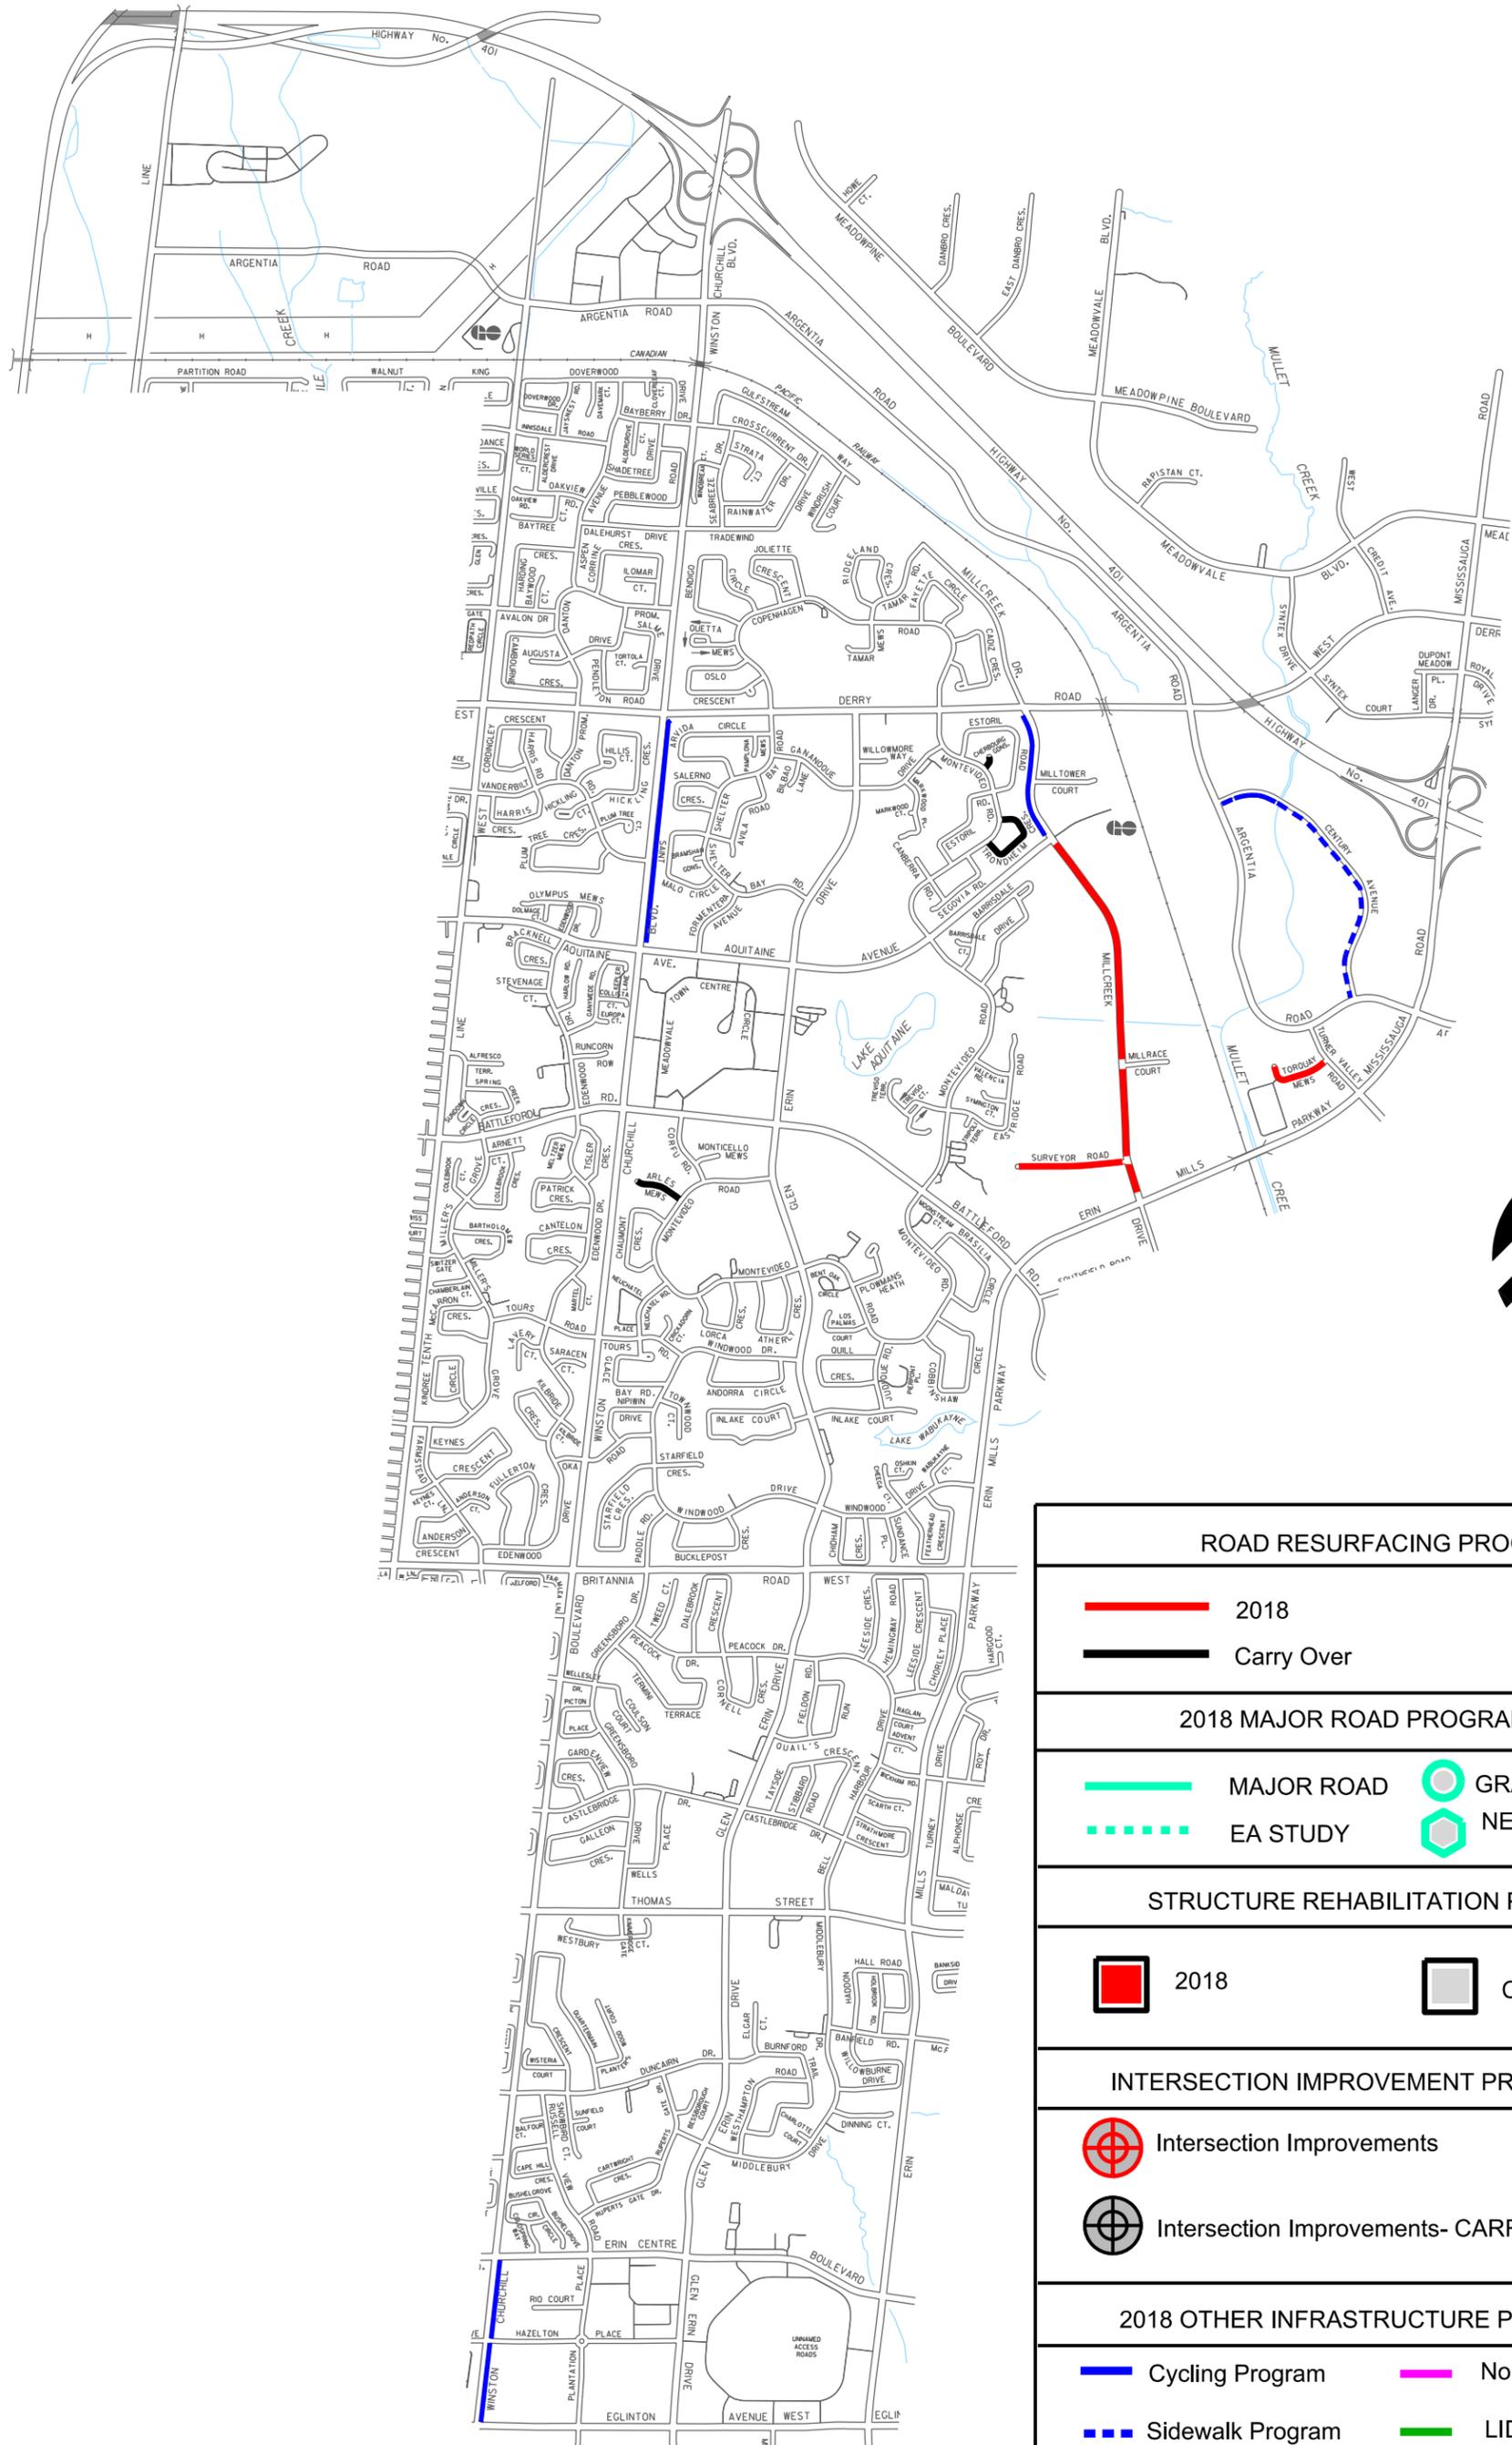

Stormwater LID Enhancements

The City’s Stormwater Program includes funding for stormwater enhancements, often called Low Impact Development (LID) techniques, to be constructed within the ROW where opportunities arise. Common LID techniques within the ROW include enhanced vegetated swales and infiltration galleries. No stormwater LID enhancement projects are planned in **Ward 9** this year.

While the City’s projects are coordinated with the Region of Peel and other utility companies, occasionally, situations arise where projects may be deferred resulting in changes to planned work.
