Statement of Qualifications and Limitations

The attached Report (the "Report") has been prepared by AECOM Canada Ltd. ("Consultant") for the benefit of the client ("Client") in accordance with the agreement between Consultant and Client, including the scope of work detailed therein (the "Agreement").

The information, data, recommendations and conclusions contained in the Report (collectively, the "Information"):

- is subject to the scope, schedule, and other constraints and limitations in the Agreement and the qualifications contained in the Report (the "Limitations");
- represents Consultant's professional judgement in light of the Limitations and industry standards for the preparation of similar reports;
- may be based on information provided to Consultant which has not been independently verified;
- has not been updated since the date of issuance of the Report and its accuracy is limited to the time period and circumstances in which it was collected, processed, made or issued;
- must be read as a whole and sections thereof should not be read out of such context;
- was prepared for the specific purposes described in the Report and the Agreement; and
- in the case of subsurface, environmental or geotechnical conditions, may be based on limited testing and on the assumption that such conditions are uniform and not variable either geographically or over time.

Consultant shall be entitled to rely upon the accuracy and completeness of information that was provided to it and has no obligation to update such information. Consultant accepts no responsibility for any events or circumstances that may have occurred since the date on which the Report was prepared and, in the case of subsurface, environmental or geotechnical conditions, is not responsible for any variability in such conditions, geographically or over time.

Consultant agrees that the Report represents its professional judgement as described above and that the Information has been prepared for the specific purpose and use described in the Report and the Agreement, but Consultant makes no other representations, or any guarantees or warranties whatsoever, whether express or implied, with respect to the Report, the Information or any part thereof.

Without in any way limiting the generality of the foregoing, any estimates or opinions regarding probable construction costs or construction schedule provided by Consultant represent Consultant's professional judgement in light of its experience and the knowledge and information available to it at the time of preparation. Since Consultant has no control over market or economic conditions, prices for construction labour, equipment or materials or bidding procedures, Consultant, its directors, officers and employees are not able to, nor do they, make any representations, warranties or guarantees whatsoever, whether express or implied, with respect to such estimates or opinions, or their variance from actual construction costs or schedules, and accept no responsibility for any loss or damage arising therefrom or in any way related thereto. Persons relying on such estimates or opinions do so at their own risk.

Except (1) as agreed to in writing by Consultant and Client; (2) as required by-law; or (3) to the extent used by governmental reviewing agencies for the purpose of obtaining permits or approvals, the Report and the Information may be used and relied upon only by Client.

Consultant accepts no responsibility, and denies any liability whatsoever, to parties other than Client who may obtain access to the Report or the Information for any injury, loss or damage suffered by such parties arising from their use of, reliance upon, or decisions or actions based on the Report or any of the Information ("improper use of the Report"), except to the extent those parties have obtained the prior written consent of Consultant to use and rely upon the Report and the Information. Any injury, loss or damages arising from improper use of the Report shall be borne by the party making such use.

This Statement of Qualifications and Limitations is attached to and forms part of the Report and any use of the Report is subject to the terms hereof.

Limited Phase One Environmental Site Assessment Limitations

This report describes the results of AECOM's Limited Phase One environmental site assessment (ESA) to identify the presence of actual or potential environmental concerns that may affect the Site. In the conduct of this Limited Phase One ESA, AECOM assessed the presence of such environmental concerns within the limits of the established scope of work as described in our proposal to The Corporation of the City of Mississauga on April 16, 2013.

As with any due diligence assessment, there is a certain degree of dependence upon oral information provided by facility or site representatives, which is not readily verifiable through visual observations or supported by any available written documentation. AECOM shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed by facility or site representatives at the time this assessment was performed. In addition, the findings and opinions expressed in this report are subject to certain conditions and assumptions, which are noted in the report. Any party reviewing the findings of the report must carefully review and consider all such conditions and assumptions.

This report and all field data and notes were gathered and/or prepared by AECOM in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of AECOM's assessment of the Site. The statements, findings and opinions contained in this report are only intended to give approximations of the environmental conditions at the Site.

It is incumbent that the client and any other parties who review and rely upon this report understand the following inherent conditions surrounding any Phase One ESA:

- Uncertainty Not Eliminated
No ESA can wholly eliminate uncertainty regarding the presence of actual or potential environmental concern in connection with a Site. The Phase One ESA findings are intended to reduce, but not eliminate, uncertainty regarding the potential for actual or potential areas of environmental concern in connection with a Site, and this practice recognizes reasonable limits of time and costs.
- Not Exhaustive
A Phase One ESA is not meant to be an exhaustive assessment of a clean Site. There is a point at which the cost of information obtained outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information.
- Comparison with Subsequent Inquiry
ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent ESAs should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors.

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions, which would render the report inaccurate. Reliance on this report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk.

January 4, 2016

Ms. Dana Glofcheskie, P.Eng.
Transportation Project Engineer
City of Mississauga
201 City Centre Drive, 8th Floor
Mississauga, ON L5B 3C1

Dear Ms. Glofcheskie:

Project No: 60304588

**Regarding: Limited Phase One Environmental Site Assessment
Creditview Road, Mississauga, ON**

AECOM Canada Ltd. was retained by the City of Mississauga to undertake a Schedule 'C' Class Environmental Assessment (EA) Study for improvements to Creditview Road. The limits of the EA Study extend from Bancroft Drive to Old Creditview Road, in the City of Mississauga. AECOM is pleased to provide you with the attached Limited Phase One Environmental Site Assessment report as part of the Municipal Class EA Process.

If you should have any comments or questions, please contact the project manager at 519-650-8656

Sincerely,

AECOM Canada Ltd.

Marie Wardman, P. Eng., QP (ESA-O Reg 153-04)
Senior Geological Engineer,

Executive Summary

AECOM Canada Ltd. (AECOM) conducted a Limited Phase One Environmental Site Assessment (ESA) for the portion of Creditview Road located between Bancroft Drive and Old Creditview Road in Mississauga, Ontario, Canada (herein referred to as the "Site"). This Limited Phase One ESA was completed for the Corporation of the City of Mississauga (the City) as part of a Schedule 'C' Class Environmental Assessment study for modifications being proposed within the Site. As such the purpose of this Limited Phase One ESA is for due diligence and not in support of the filing of a record of site condition. The assessment was conducted in order to identify potential or actual environmental concerns resulting from current or past activities on the Site or neighbouring properties.

The Limited Phase One ESA was carried out by AECOM Canada Ltd. (AECOM) in general accordance with Ontario Regulation 153/04 as amended, with the exception that there were no property-specific inspections and/or associated interviews carried out as part of the assessment, and that site observations were made from publically accessible locations.

Background

The Site is rectangular in shape and runs north-south along Creditview Road. The Site contains residential, commercial and industrial areas. There is a large area of green space surrounding the Credit River, to the east of the Site, as well as where the river flows through the southern portion of the Site.

As shown in the aerial photograph dated 1960, the Site was primarily utilized for agricultural purposes at that time, with some sections of undeveloped, forest covered land. Residential redevelopment occurred east of Creditview Road in the 1974 aerial photograph, with further expansion visible in the image from 1985. In the most recent aerial image significant residential, commercial and industrial development is present in the Site.

Based on the historical documents and the windshield survey, commercial and industrial land use within the Site and surrounding areas include, but are not limited to, activities such as: analytical laboratories, grocery stores, pharmacies, woodworking spaces, synthetic dye and pigment manufacturing, motor manufacturing, and machinery manufacturing. Some of these industrial operations are classified by the Ministry of the Environment and Climate Change (MOECC) as potentially contaminating activities (PCAs). A gas station is located within 250 metres of the Site.

Conclusions

Based on the observations and records review, six areas of potential concern (APECs) were identified within the Site, as summarized in **Table E1**.

Table E1. Table of Areas of Potential Environmental Concerns

APEC #	Location of Area of Potential Environmental Concern	Potential Concerns	Contaminants of Potential Concern	Media Potentially Impacted
1	6760 Campobello Road	PCA-A Historical metal fabrication: Rumble Automation 1994-1998 Metal Fabrication [MOECC Sch. D classification 34]. Historical vehicle stamping and motor vehicle gasoline engine and engine parts manufacturing: Tier Automotive 1986-2001 Vehicles and Associated parts manufacturing [57]	Metals, VOCs Petroleum Hydrocarbons, VOCs, Metals	Soil, groundwater Soil, Groundwater

Table E1. Table of Areas of Potential Environmental Concerns

APEC #	Location of Area of Potential Environmental Concern	Potential Concerns	Contaminants of Potential Concern	Media Potentially Impacted
2	6780 Creditview Road	PCA-B Historical Bulk Chemical Storage: CIBA Specialty Chemicals Canada Inc., GE BETZ Canada, Servi-Logistics Inc., 2002-2009 Chemical Manufacturing, Processing, and Bulk Storage [8]	VOCs, Metals, Inorganics, PAHs	Soil, Groundwater
3	6820 Creditview Road	PCA-C Electronic and Computer Equipment Manufacturing, Former Semiconductor and other electronic component manufacturing [19]	Metals, VOCs	Soil, Groundwater
4	Along the western site border from 6820 Creditview Road to Highway 401	PCA-P Chemical manufacturing, processing and bulk storage [8] Rubber manufacturing and processing Historical properties: Shell chemicals Canada , Serviplast Inc. [47]	Metals, Inorganics, VOCs	Soil, Groundwater
5	Along the western site border from 6820 Creditview Road to 1551 Oran Court	PCAs-G, H, I, J, K, L, M, N Electronic and Computer Equipment Manufacturing[19], Metals treatment, coating, plating and finishing – historical [33], Foam and expanded foam manufacturing and processing [26], Operation of dry cleaning equipment (where chemicals are used) [37]. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems) [52]	Metals, PAHs, Petroleum Hydrocarbons, VOCs	Soil, Groundwater
6	Along the southern site border from 6136 Camgreen Circle to 14446 Emerson Lane.	PCAs-E and O Gasoline and Associated Products storage in fixed tanks [28], Operation of dry cleaning equipment (where chemicals are used) [37]	Petroleum Hydrocarbons VOCs, PAHs	Soil, Groundwater

Notes: VOCs – Volatile Organic Compounds, BTEX – Benzene, Toluene Ethyl benzene and Xylene; PHC – petroleum hydrocarbon; EC – Electrical Conductivity; SAR – sodium absorption Ration, OC – Organochlorine; OP- Organophosphate

Based on the findings of this Limited Phase One ESA and the identified APECs on the Site, and the PCAs on the properties in the 250 m buffer zone, follow-up Phase Two ESA activities will be required prior to any contemplated Record of Site Condition filing with the Ontario Ministry of Environment and Climate Change (“MOECC”) in accordance with O.Reg. 153/04. However, it should be noted that the investigation discussed in this Limited Phase One ESA does not include interviews with owners or occupants and does not include physical inspections of each municipal address. Therefore, further site investigations, as specified in O.Reg. 153/04, should be conducted prior to developing a scope of work for any Phase Two ESAs.

The Limited Phase One ESA was completed as part of the review of existing conditions for the EA Study.

1. Introduction

AECOM Canada Ltd. (AECOM) conducted a Limited Phase One Environmental Site Assessment (ESA) for the portion of Creditview Road located between Bancroft Drive and Old Creditview Road in Mississauga, Ontario, Canada (herein referred to as the “Site”). This Limited Phase One ESA was completed for the Corporation of the City of Mississauga (the City) as part of a Schedule ‘C’ Class Environmental Assessment study for modifications being proposed within the Site. As such the purpose of this Limited Phase One ESA is for due diligence and not in support of the filing of a record of site condition. The assessment was conducted in order to identify potential or actual environmental concerns resulting from current or past activities on the Site or neighbouring properties.

The Limited Phase One ESA was carried out by AECOM Canada Ltd. (AECOM) in general accordance with Ontario Regulation (O.Reg.) 153/04 as amended, with the exception that there were no property-specific inspections and/or associated interviews carried out as part of the assessment, and that site observations were made from publically accessible locations. O.Reg. 153/04 also refers to the Site as the “Phase One Property”.

A general location plan is provided on **Figure 1**. The Site and surrounding properties are shown on **Figure 2**. Selected photographs of the Site are included in **Appendix A**.

1.1 Phase One Property Information

The Site is located within the City of Mississauga, Regional Municipality of Peel (Region of Peel) and consists of an approximately 2,400 m long portion of Creditview Road (i.e., between Bancroft Road and Old Creditview Road) and neighbouring properties. Creditview Road currently consists of an urban, asphalt paved, two-lane roadway, measuring approximately 30 metres in width. For the purposes of this Limited Phase One ESA, the limits of the Site include approximately 150 metres to the west and east of the corridor. In total, the Site includes approximately 250 properties and covers approximately 81.12 hectares. The Site is legally described as lots 6, 7, 8, 9, 10 Concession 3, Lots 6, 7, 8, 9, 10 Concession 4.

The study area consists of the Site plus surrounding properties that are within 250 metres of the site boundary (referred to as the “250 buffer zone”). Land uses within the study area primarily consist of residential and commercial areas, with the exception of a large area of green space within the northeast portion of the Site, immediately adjacent to Creditview Road, as well as surrounding the Credit River which traverses the south portion of the Site.

Water supply and sanitary sewers present in the Site are operated by the Region of Peel. Storm sewers present under roadways that are maintained by the City, such as Creditview Road, are the jurisdiction of the City of Mississauga.

2. Scope of Investigation

The Limited Phase One ESA was carried out by AECOM Canada Ltd. (AECOM) in general accordance with Ontario Regulation 153/04, as amended.

The activities completed, included:

- A windshield survey of the study area, collection of photographs and visual assessment of the property and adjacent lands to document present environmental conditions;

- A review of available aerial photography, geological mapping and historical reports;
- A review of regulatory information including federal, provincial, and municipal records through Ecolog's Environmental Risk Information Service (ERIS);
- Review and evaluation of all public information obtained; and
- Preparation of a summary report.

The records listed in the following **Table 2** were reviewed in accordance with the Regulation.

Table 2. Summary of Records Reviewed

Physiographic Maps	ERIS	X	X
Geological Maps	ERIS	X	X
Well Records	ERIS	X	X

The review of records, and historical aerial photographs and maps was completed in the fall of 2013. A windshield survey of the study area was conducted by Ms. Sarah Doiron of AECOM on August 25, 2015. Ms. Doiron was accompanied by Mr. David Dunn of AECOM during the site visit. Readily visible and publicly accessible portions of the Site and surrounding properties were examined for the presence of areas of potential environmental concern (APEC). Individual land parcels were not investigated during the survey.

During AECOM's windshield survey, no visual evidence of water wells, monitoring wells, dry wells, clarifiers, or septic tanks or leach fields was observed within the Site. In addition, no visual evidence of discolored soil, water, or unusual vegetative conditions or odours was observed.

A Phase One ESA does not include sampling or testing of air, soil, groundwater, surface water or building materials. For this Limited Phase One ESA, no enhancements were made. This assessment did not include a review or audit of operational environmental compliance issues, hazardous substances, or of any environmental management systems, which may exist for the Site and/or its adjacent properties.

O.Reg. 153/04 specifies that each property be inspected and interviews be conducted with owners and/or occupants. For the purposes of this EA study, and given the large number of properties involved no on-site inspections of properties, or interviews conducted. All observations were conducted from publically accessible locations.

3. Records Review

3.1 General

3.1.1 *Phase One ESA Study Area Determination*

The study area for the Phase One ESA consists of the Site plus surrounding properties that are within 250 metres of the site boundary. Records were reviewed for the properties falling fully or partially within the 250 m radius. This search radius was selected to account for all likely potential influences to the Site, in accordance with the O.Reg. 153/04.

3.1.2 *First Developed Use Determination*

A 1944 aerial photograph the earliest documentation available for the Site and indicated that Creditview Road was present at that time. Lands surrounding the Site generally consisted of agricultural or undeveloped/forested land. Some farmhouses and/or agricultural buildings were also present. Therefore, the first developed use cannot be specifically determined. As a worst case, conservative estimate, the first developed use is assumed to be 1875, in accordance with O.Reg. 153/04. It should be noted that if individual properties are further investigated, the date of first development may be much later, since according to aerial photographs, construction on some properties did not occur until the 2000s.

Residential subdivisions began to appear east of Creditview Road in the 1970s. As time progressed, the land within the Site was used for a variety of purposes, including residential, commercial, and industrial.

3.1.3 *Fire Insurance Plans*

AECOM initiated a search for Historical Environmental Information Reporting System ("HEIRS") records through Opta Information Intelligence ("Opta") on October 31, 2013. HEIRS provides historical insurance inspection reports and mapping, which may contain relevant details such as building development dates, fuel storage tank locations, and building structure and use information. Opta confirmed that there were no Fire Insurance Plans, Reports or Site Plan(s) available for properties within the Site.

A copy of the search request is included in **Appendix C**.

3.1.4 *City Directories*

A city directory search was conducted by Sarah Doiron of AECOM on October 9, 2015 at the Mississauga Central Library. City directories for the City of Mississauga were available from 1969-2001. A summary of the information is provided below, with the tabulated details presented in Appendix F.

In the 1969-70 directory, only residential properties are listed within the Site, along Kenninghall Boulevard. Residential growth within the Site continued in the 1970s. In 1979, the properties within the 250 m buffer zone along on Falconer Drive began to be developed, or redeveloped for additional commercial land use.

According to the 1983 directory, the listings for properties within the Site remain predominantly residential. The study area generally consisted of commercial land uses along Campobello Road, Argentia Road, and Falconer Drive.

In the 1990, 1995 and 2000 directories, commercial/industrial land uses were listed on Campobello Road (i.e., on-site). Commercial land uses also occupied Creditview Road, Campobello Road, Argentia Road, and Falconer Drive, within the study area.

Based on the review of the city directories, historical occupants anticipated to have been conducting potentially contaminating activities (PCAs) as defined by O.Reg. 153/04 were identified on the Site or within the surrounding 250 m buffer zone. These properties and occupants are outlined in **Table 3** below.

Table 3. City Directory Identified Potentially Contaminating Activities (PCA)

Address	Name	Year(s)	PCA	On-Site or within 250 m Buffer Zone
6601 Falconer Drive	Meadowvale Sunoco/Precision Quality Auto Care	1979-2001	Gasoline Service Station/Auto Repair Facility	250 m Buffer Zone
1705 Argentia Road	Meadowvale Auto Repair Specialists	1983-2001	Auto Repair Facility	250 m Buffer Zone
6690 Campobello Road	Ionic Finishing Ltd.	1990	Metal Finishing	250 m Buffer Zone
6085 Creditview Road	Cadet Cleaners	2001	Dry Cleaning Facility	250 m Buffer Zone

3.1.5 Chain of Title

Due to the large numbers of properties within the Site, obtaining historical Chain of Titles is not practical. It is recommended that Chain of Titles be evaluated for individual properties should they be required for more detailed investigation.

3.1.6 Survey

No land surveys were provided for the Limited Phase One ESA.

3.1.7 Environmental Reports

No previous reports regarding the Site or surrounding 250 m radius buffer zone were provided to AECOM for review.

3.2 Environmental Source Information

3.2.1 Environmental Database

AECOM retained EcoLog ERIS Ltd. (ERIS), an environmental database and information services company, to conduct a database search for the Site and the 250 m buffer zone. A custom ERIS report was prepared as part of this assessment. A copy of this report is included as **Appendix D**. ERIS reports provide environmental and historical information compiled from government and private source records. Relevant databases were determined by the Regulation and included but were not limited to:

- Anderson's Waste Disposal Sites
- Automobile Wrecking & Supplies
- Certificates of Approval
- Compliance and Convictions
- Environmental Registry
- Fuel Storage Tank
- Ontario Regulation 347 Waste Generators Summary
- National PCB Inventory
- National Pollutant Release Inventory
- Inventory of PCB Storage Sites
- Pesticide Register
- Private and Retail Fuel Storage Tanks
- Record of Site Condition
- Retail Fuel Storage Tanks
- Scott's Manufacturing Directory
- Ontario Spills
- Water Well Information System

The other databases in the ERIS report were reviewed but did not contain any useful or relevant information for this Limited Phase One ESA. Definitions for the databases can be found following the records within the ERIS report provided in **Appendix D**.

The relevant records from the ERIS report are summarized in **Table 4**.

3.2.2 MOECC Freedom of Information “FOI” Request

A request was made to the Ontario Ministry of the Environment and Climate Change (“MOECC”, formerly referred to the Ministry of the Environment or MOE) through the Freedom of Information and Privacy Protection office for a search of their records regarding charges and/or convictions of owners or tenants of the Site, violations of applicable environmental regulations issued against the Site, and reportable spills occurring at or near the Site on November 7, 2013. A response regarding the existence of records for the Site was received December 6, 2013 (dated November 18, 2013). No records were located during a thorough search of the Ministry’s Halton-Peel Region District Office, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch.

3.2.3 Municipal Records

A search request for environmental records was submitted to the City of Mississauga under the Freedom of Information and Protection of Privacy Act (“MFOIPPA”) on November 4, 2013. A response regarding the existence of records for the Site was not received. Any relevant information received by AECOM from the MFOIPPA request will be forwarded to the client if received. A copy of the request to the City is provided in Appendix B.

3.2.4 Technical Standards and Safety Authority (TSSA)

A request to the Technical Standards & Safety Authority (“TSSA”) was initiated for a search of their records regarding tank installations or fuelling facilities that are or were present on the Site. A reply from the TSSA on October 31, 2013 indicated that no records were identified for the Site.

Table 4. Summary of EcoLog ERIS Records

Database Name	No. of Records	Details	Potential Environmental Concerns Identified
Certificates of Approval	10	<p>Two C of As for within the Site: Both C of As were issued to Legend Creek Homes (River Gate) Ltd., for Municipal and Private Sewage Works in 2003 and 2004.</p> <p>Eight C of As were issued within the 250 m buffer zone:</p> <ul style="list-style-type: none"> • Two C of As for air emissions (Maxxam Analytics, 6740 Campobello Road & Classic Creative Interior Woodwork Limited, 6690 Campobello Road). • Four for Municipal Water (2725312 Canada Inc. and Markborough Properties Inc.). • Two for Municipal Sewage (2725312 Canada Inc. and Markborough Properties Inc.). 	None identified based on the record type.
Environmental Activity and Sector Registry	3	<p>Two records for within the Site: Both for Creation Technologies LP, 6820 Creditview Road. Both records were for heating systems registered in 2015.</p> <p>One record within the 250 m buffer zone:</p> <ul style="list-style-type: none"> • Katoen Natie Canada (6660 Financial Drive, Mississauga) for a heating system registered in 2012. 	None identified based on the record type.
Environmental Registry	6	<p>Three records for within the Site: All for Creation Technologies, 6820 Creditview Road, All for approval to discharge into the natural environment other than water (i.e. air).</p> <p>Three records within the 250 m buffer zone:</p> <ul style="list-style-type: none"> • Maxxam Analytics Inc., 6740 Campobello Road, Mississauga: Instrument Decision (2004), EBR Registry No. IA04E0733, Ministry Ref. No. 8755-5YGRSY. Approval for discharge into the natural environment other than water (i.e., Air). • Classic Creative Interior Woodwork Limited, 6690 Campobello Road, Mississauga: Instrument Proposal (2006), EBR Registry No. IA06E1194, Ministry Ref. No. 6149-6TTSKE. Approval for discharge into the natural environment other than water (i.e., Air). • Katoen Natie Canada Company, 6660 Financial Drive, Mississauga: Instrument Proposal (2012), EBR Registry No. 011-6012, Ministry Ref. No. 0300-8RBSK3. Environmental Compliance Approval (Project Type: Air). 	None identified based on the record type.
Ontario Regulation 347 Waste Generators Summary	130	<p>Thirty-five records covering nine different properties within the Site:</p> <ul style="list-style-type: none"> • Canadian Retail HA (6800 Campobello Road), generator of waste photoprocessing wastes from 1993-1999. • Dairy Farmers of Ontario/Ontario Milk Marketing Board (6780 Campobello Road) was a generator of petroleum distillates and halogenated solvents from 1992-1998 and paint/pigment/coating residues, and graphic art wastes. • Gyptech Manufacturing Inc. (6760 Campobello Road) was a generator of several wastes, including waste oils and lubricants, acid solutions-containing heavy metals, aromatic solvents and residues, waste oils/sludges, waste compressed gases (including cylinders) from 2007-2012. • Fathom Oceanology Ltd. (6760 Campobello Road) was a generator of neutralized wastes –heavy metals and emulsified oils from 1986-1998. • Pensionfund Realty Ltd. (6760 Campobello Road) was a generator of petroleum distillates and light fuels from 2002-2004. • Hy-Drive Technologies Ltd. (6760 Campobello Road) was a generator of alkaline wastes-other metals in 2005. • CIBA Speciality Chemicals Inc. (6780 Creditview Road) was a generator of amines, inorganic laboratory chemicals, inert organic wastes, latex wastes, polymeric resins, and organic laboratory chemicals from 2002-2008. • BASF Canada Inc. (6780 Creditview Road) was a generator of detergents/soaps and amines from 2009-2012. • Creation Technologies (6820 Creditview Road) was a generator of alkaline solutions-containing other metals and non-metals from 2009-2012. <p>Ninety-five records within the 250 m buffer zone, covering 15 different properties:</p> <ul style="list-style-type: none"> • Maple Leaf Drives Ltd. (1605 Argentia Road) was a generator of petroleum distillates and waste oils and lubricants from 1997-2001. • Batten (Out of business, 1605 Argentia Road) was a generator of neutralized wastes, paint/pigment/coating residues, waste oils and lubricants, and acid waste-heavy metals from 1986-1999. 	Generation of Subject Wastes within the Site and within the 250 m buffer zone represents an area of potential concern (APEC), in particular since site visits were not performed on individual properties. Therefore, storage and handling could not be evaluated.

Table 4. Summary of EcoLog ERIS Records

Database Name	No. of Records	Details	Potential Environmental Concerns Identified
		<ul style="list-style-type: none"> • Harshaw (6616 Campobello Road) was a generator of inorganic chemicals from 1992-1998. • Canada Post Corporation (6616 Campobello Road) was a generator of several waste classes from 2002-2004. • Dow Corning Canada Inc. (6747 Campobello Road) was a generator of several waste classes from 1998-2001. • Icyne Inc., (6747 Campobello Road) was a generator of polymeric resins from 2005-2010. • Maxxam Analytics (6740 Campobello Road) was a generator of several waste classes from 2007-2012. • The address of 6660 Campobello Road (Sun Life Assurance of Canada, Copeland RDI, Hayward Gordon Ltd.) was a generator of several waste classes from the 1980s-1999. • Canadian Timken Ltd. (6700 Campobello Road) was a generator of petroleum distillates from 2001-2004. • Brinkman Instruments (6670 Campobello Road) was a generator of several waste classes from 1999-2003. • Ionic Finishing Inc. (6690 Campobello Road) was a generator of several waste classes from 1986-1998. • The address of 6680 Campobello Road (Aimtronics Corporation, Creation Technologies Inc. was a generator of inorganic laboratory chemicals and aliphatic solvents from 1999-2004. • The address 6660 Financial Drive had several generators of several waste classes. • Pharma Plus Drug Mart (6085 Creditview Road) was a generator of pharmaceutical waste from 1998-2001. • Tech Data (6901 Creditview Road) was a generator of light fuels from 2010-2012. 	
TSSA Historic Incidents	4	<p>Three TSSA Historic Incidents records were identified within the Site.</p> <ul style="list-style-type: none"> • 1551 Oran Court (Ext. File No. FS INC 0706-03144) on May 11, 2007 a vapour release of natural gas was reported at a private dwelling. There was no associated property damage. • 6435 Dunray Court (Ext. File No. FS INC 0708-04122) on July 25, 2007 a natural gas pipeline strike occurred at a construction site. There was no associated property damage. • 1485 Estes Crescent (Ext. File No. FS INC 0708-04123) on June 29, 2007 a natural gas pipeline strike occurred at a construction site. There was no associated property damage, and it was determined to be an incident/near miss occurrence. <p>One (1) incident within the 250 m buffer zone:</p> <ul style="list-style-type: none"> • A gaseous fuel incident occurred at 6155 Camgreen Circle, Mississauga (External File No. FS INC 0906-03213, no date provided). 	These incidents do not represent an area of concern for the Site.
National Pollutant Release Inventory	4	<p>Three records for the Site, all for Creation Technologies (6820 Creditview Road), for lead usage. Release to air, water, or land not specified.</p> <p>One record within the 250 m buffer zone: Icyne Inc. (6747 Campobello Road) for polymeric diphenylmethane diisocyanate and Methylenebis (phenylisocyanate). Release to air, water, or land not specified.</p>	This record, in itself, does not represent an area of concern for the Site.
Pesticide Registry	13	<p>Three records within the Site all for Green Blade Lawn Care (17 Dunray Drive, Mississauga a residence). License Type: Operator.</p> <p>Ten records within the 250 m buffer zone, covering three properties:</p> <ul style="list-style-type: none"> • Four records for Simply Green Garden Gray and Landscaping (45 Steen Drive, a residence). License type: Operator • Three records for Loblaw Supermarkets Ltd. (6085 Creditview Road) License type: Vendor, Limited vendor, and general vendor • Three records for No Frills (6085 Creditview Road) License Type: Vendor, Vendor Limited. 	These records do not represent a potential area of concern since these are retail outlets or lawn maintenance companies applying pesticides on other properties, and chemicals are likely stored in limited quantities.
TSSA Pipeline Incident	1	<p>One record within the Site: The incident was a heating fuel (natural gas) pipeline strike at 1562 Oran Court, Mississauga (private dwelling), in which a ½" pipeline was struck on 8/5/2010. There were no reported health or environmental impacts. The incident was reported by Enbridge (Incident ID 2632210, Incident No. 475926).</p> <p>No records within the 250 m buffer zone.</p>	This record does not represent an area of concern for the Site.

Table 4. Summary of EcoLog ERIS Records

Database Name	No. of Records	Details	Potential Environmental Concerns Identified
Scott's Manufacturing Directory	29	<p>Six records within the Site:</p> <ul style="list-style-type: none"> • Fenix Tactical (6730 Falconer Drive) Lighting Fixture Manufacturing established in 2004. • Dairy Farmers of Ontario (6780 Campobello Road) Periodicals: Publishing, or Publishing & Printing established in 1965. • Tier Automotive Inc. (6760 Campobello Road) Motor Vehicle Gasoline Engine and Engine Parts Manufacturing established in 1986. • Rumble Automation Inc. (6760 Campobello Road) Special Dies and Tools, Die Sets, Jigs and Fixtures, and Industrial Molds. • Gypsum Technologies Inc. (6760 Campobello Road) All Other Industrial Machinery Manufacturing established in 1993. • Creation Technologies Inc. (6820 Creditview Road), Semiconductor and Other Electronic Component Manufacturing. <p>Twenty-three records within the 250 m buffer zone, covering 17 properties:</p> <ul style="list-style-type: none"> • Precision Quality Auto Care (6601 Falconer Drive) General Auto repair. • Acepharm Laboratories (1605 Argentia Road) Pharmaceutical Preparations. • Unik Hospital Supplies (1605 Argentia Road) Surgical & Medical Instruments & Apparatus. • FTC Toys LTD. (6616 Campobello Road) Games, Toys and Children's Vehicles, except Dolls and Bicycles. • Icyne Inc. (6747 Campobello Road) Urethane and Other Foam Product (except Polystyrene) Manufacturing, Polystyrene Foam Product Manufacturing. • DOW Corning Canada Inc. (6747 Campobello Road) Industrial Organic Chemicals, Not Elsewhere Classified. • Hitachi Canada Ltd. (6740 Campobello Road) Electric Components, Navigational and Communications equipment and supplies wholesaler-distributors Equipment, Not Elsewhere Classified and distributors of various other equipment. • Provincial Partitions Ltd. (6660 Campobello Road) Showcase, Partition and various other equipment. • Hayward Gordon Ltd. (6660 Campobello Road) Construction Machinery Manufacturing, All Other Industrial Machinery Manufacturing, Industrial and Commercial Fan and Blower and Air Purification Equipment Manufacturing, and manufactures of various other equipment. • A.M.A. Inc. (6699 Campobello Road) Computer Systems Design and related Services, Wholesale Trade Agents and Brokers. • Canadian Timkin Limited (6700 Campobello Road) Ball and Roller Bearings. • CCI – Classic Software (6696 Campobello Road) All Other Miscellaneous Wood Product Manufacturing, Showcase, Partition, Shelving and Locker Manufacturing. • Aimtronics Corporation (6680 Campobello Road) Measuring, Medical and Controlling Devices Manufacturing and various other equipment. • Verbatim Americas LLC (6196 Kishy Drive) Computer, Computer Peripheral and Pre-Packaged Software Wholesaler-Distributors, Video Cassette Wholesalers, Stationary and Office Supplies Wholesaler-Distributors. • Berko Electric Ltd. (6108 St. Ives Way) Power, Distribution and Speciality Transformers Manufacturing, Motor and Generator Manufacturing, Switchgear & Switchboard Apparatus • Livellara Enterprises (6045 Roxbury Road) Wholesale Trade Agents and Brokers, Insurance Agencies and Brokerages, Investment Advice. • Vector Lighting Inc. (6310 Cengreen Drive) Lighting Fixture Manufacturing. 	<p>Gasoline engine and engine parts manufacturing, as well as electronic component manufacturing represent APECs for the Site.</p> <p>Off-Site auto repair, industrial chemical manufacturing, electronic component manufacturing, and transformer manufacturing represent potentially contaminating activities for the Site.</p>

Table 4. Summary of EcoLog ERIS Records

Database Name	No. of Records	Details	Potential Environmental Concerns Identified
Ontario Spills	9	<p>Two records have been identified within the Site:</p> <ul style="list-style-type: none"> A spill was reported to the MOECC on in 1997 at 15 Pine Cliff, Streetsville, Mississauga, (Reference No. 140113). The incident cause was unknown; there was gasoline of an unknown source in a sump, and odours in the storm sewer. The databased indicated that possible environmental impact of water was possible. A spill was reported to the MOECC in 1993 at 6545 Creditview Road (N.O.S), Mississauga (Reference No. 88218). The cause was a pipe/hose leak, resulting from damaged furnace oil piping. Oil seeped to the ground, resulting in confirmed environmental impact. However, the residence at this address is located approximately 350 m from the Creditview Road, and therefore the actual spill location was concluded to be outside the site and the 250 buffer zone. <p>Seven records were identified within the 250 m buffer zone:</p> <ul style="list-style-type: none"> Two spills occurred at 6747 Campobello Road. One was 680 kg of polyol to ground, environmental impact possible. The other was a spill of tetramethyliminobispropylamine (453.6 kg) to ground, environmental impact also possible. Two of the incidents indicted environmental impact was not anticipated. One incident was a release to into air and therefore unlikely to cause any soil or groundwater contamination. One diesel fuel spill (Hwy 401, 1 km east of Mississauga Road; however, it does not appear to be located within the study area. One diesel fuel spill occurred at Creditview Road and Old Creditview Road. Diesel (unspecified amount) to road and catchbasin. However, the only impact listed is surface water pollution. 	<p>The spill into the storm sewer does not necessarily represent an APEC. The impact to water is likely no longer evident on the Site and unlikely to cause soil or groundwater contamination.</p> <p>The was from damaged furnace oil piping and therefore, the spill location is unlikely to be within the Site.</p> <p>Tetramethyliminobispropylamine is classified as a corrosive, toxic liquid. The two spills at 6747 Campobello Road represent potentially contaminating activities for the Site.</p>
Water Well Information System	20	<p>Thirteen records were identified within the Site.</p> <p>Seven listings were identified within the 250 m buffer zone.</p>	None identified based on the record type.
TSSA Expired Facilities (EXP)	5	<p>Zero entries for the Site.</p> <p>Five records within the 250 m buffer zone:</p> <p>All five records were for Precision Automotive, located at 6601 Falconer Drive.</p>	The historical presence of fuel storage tanks represents buffer zone PCA for the Site
Fuel Storage Tank/Private and Retail Fuel Storage Tanks (FST/PRT/RST)	7	<p>Zero for the Site.</p> <p>Five records (FST & RST) within the 250 m buffer zone. All five were for 6035 Creditview Road, representing 4 fuel USTs.</p> <p>One private and retail fuel storage tank (PRT) record for Precision Automotive (6601 Falconer Drive, Mississauga).</p>	The historical presence of fuel storage tanks within the buffer zone represents a PCA.
Canadian Pulp and Paper	2	<p>Zero records within the Site.</p> <p>Two records for the 250 m buffer zone:</p> <ul style="list-style-type: none"> Dow Corning Canada Inc. (6747 Campobello Road, Mississauga), Company ID: 2950862687, has a directory listing from 2009. The status is inactive. Maxxam Analytics Inc. (6740 Campobello Road, Mississauga), Company ID: 275464009, has a directory listing from 2009. The status is inactive. 	None identified based on the record type. These facilities are likely suppliers to the pulp and paper industry, not pulp and paper mills themselves.
Record of Site Condition	1	<p>Zero records within the Site.</p> <p>One record for the 250 m buffer zone:</p> <ul style="list-style-type: none"> A RSC was submitted on June 9, 2009 (certification date 2-Apr-2009) for 2095990 Ontario Inc. (6611 Falconer Drive, Mississauga). The registration number is 54510. The intended property use is listed as residential, and the current use is listed as commercial. No CPU was issued. The applicable standards are: Full depth site conditions standard, with potable groundwater, coarse textured soil, for residential/parkland/institutional property. 	None identified based on the record type.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs were reviewed on the City of Mississauga GIS website for the years 1944, 1954, 1989, 1992, 1995, 2000, 2015. Additional aerial photographs were obtained from the ERIS for the years 1960, 1974, and 1985. Copies of the aerial photographs supplied by ERIS are provided in **Appendix E**. A 2009 satellite image photograph was also reviewed from Google Earth™ Pro. Aerial photograph observations are summarized below:

- In the 1944 aerial photograph, the only roads present are Creditview Road, and a smaller road where the current day Highway 401 is ultimately constructed. The land use is primarily agriculture with some areas containing undeveloped forest plots. Several farmhouses or agricultural buildings are scattered throughout the site. The Credit River is visible west of the northern end of the Site, and then turns and flows east across the southern end of the Site.
- It does not appear that there are any changes in land use between the 1944 and 1954 aerial photographs.
- In the 1960 aerial photograph, the Site was not developed and appeared to be in use for agricultural purposes, along with the surrounding lands. The community of Streetsville is visible to the southwest of the Site. Highway 401 is located through the more northern portion of the Site. The Credit River is located to the east of the Site, then runs east-west through the southern portion of the Site. There is no development surrounding Britannia Road West in the area of the southern site boundary.
- The 1974 aerial photograph shows that development has occurred east of Creditview Road, in the area that is currently Falconer Drive. From the aerial image, the development appears to be primarily residential. Residential development does not extend past Argentina Road, and that land appears to be primarily agricultural or green space. The land west of Creditview Road remains undeveloped or agricultural in the site area. Development has not begun surrounding Britannia Road, in the vicinity of the site boundary. Highway 401 traverses the north portion of the Site.
- Additional significant development was visible on the Site in the 1985 aerial photograph. East of Creditview Road, south of Highway 401 is developed with residential, commercial and industrial properties. The area surrounding Argentina Road has been developed, and Campobello Road is now populated. Residential development west of Creditview Road, off of Kenninghall Crescent, near to the Credit River, is visible. Construction is visible north of Britannia Road (east of Creditview Road), with the layout a residential development, although buildings are not yet visible. There is no residential or commercial/industrial development north of Highway 401 in the area of the Site. The growth of the City of Mississauga into the area surrounding the Site is evident.
- The 1989 aerial photograph is similar to the photo from 1985. The area west of Creditview Road is developed with both commercial and residential land uses. There are no structures present north of Highway 401.
- In the 1992 and 1995 aerial photographs, additional residential subdivisions have been constructed east of Creditview Road, between the Credit River and Britannia Road. No other major differences from the 1989 aerial photograph were observed.
- In the 2000 aerial photograph, several buildings are present on the north of Highway 401, west of Creditview Road. These buildings appear to be commercial/industrial warehouse buildings. No other major differences were observed.
- In the 2009 satellite image, the majority of the properties within the Site are developed, with many residential neighbourhoods, commercial and industrial areas. There are many businesses located west of Creditview Road, south of Highway 401, on Campobello Road. The area directly surrounding the winding Credit River remains primarily green space and parklands. Properties north of Britannia Road

West are significantly developed, with residential areas as well as commercial properties. Development has also occurred north of Highway 401 since the 2000 aerial image; commercial/industrial development is visible west of Creditview Road, with some residential properties off of Old Creditview Road. The City of Mississauga has expanded and encompassed the properties within the site area.

- The 2015 aerial photograph does not appear to differ from the 2009 aerial photograph.

3.3.2 Topography, Hydrology, Geology

Based on available surficial geology maps, native surficial soils in the vicinity of the Site are comprised of Halton Till (Ontario-Erie lobe), which consists of predominately silt to silty clay matrix, high in matrix carbonate content and clast poor. The 13 Water Well Information System (WWIS) records included in the ERIS report provided minimal and conflicting information on soil type and stratigraphy in the surrounding area; therefore, these records cannot be relied on for additional information concerning site surficial geology.

Map 2441 of the Ontario Geological Survey identifies bedrock in the area as Upper Ordovician, Georgian Bay formation, which is comprised of grey shale with limestone interbeds.

3.3.3 Fill Materials

No fill materials were observed during the windshield survey.

3.3.4 Water Bodies and Areas of Natural Significance

Based on the Atlas of Canada published by Natural Resources Canada (**Figure 3**) the elevation of the Site ranges from approximately 168 to 167 metres above sea level (masl) from the northwest to southeast, respectively. Areas of lower elevation exist around the Credit River. The Site slopes gently towards the Credit River. The inferred groundwater flow direction is towards the Credit River.

3.3.5 Well Records

A total of thirteen water wells were identified within the study area (Refer to Table 5).

Table 5. Water Well Information System Summary

Well ID	Concession	Lot	Primary Water Use	Final Well Status	Flowing
4902666	4	8	Not Used	Test Hole	No
4902665	4	8	Not Used		No
4905052	4	7	Domestic	Water Supply	No
4902588	3	7	Livestock	Water Supply	No
7186377	-	-	-	-	-
7176655	3	9	-	-	-
7186379	-	-	-	-	-
7186378	-	-	-	-	-
7186380	-	-	-	-	-
7170296	-	-	Monitoring	-	-
7161944	-	-	-	Test Hole	-
4902664	4	7	Domestic	Water Supply	No
4910063	4	7	Not Used	Observation Wells	-

The presence of water wells in the study area do not present an APEC for the Site.

3.4 Site Operating Records

The Site contains a mix of residential, commercial and industrial purposes. As noted in Section 3.2.3 a search request for relevant environmental records was submitted to the City of Mississauga. These records may include regulatory permits and records related to APECs, underground utility drawings, inventories of chemicals used and stored, inventory of aboveground and underground storage tanks, environmental monitoring data, process, production and maintenance documents related to APECs, records of spills and discharges of contaminants, emergency response and contingency plans, and environmental audit reports. A response regarding the existence of records for the Site has not been received.

4. Interviews

No interviews were conducted as part of this Limited Phase One ESA.

5. Site Reconnaissance

5.1 General Requirements

The review of records, and historical aerial photographs and maps was completed in the fall of 2013. A windshield survey was completed in August 2015 to confirm present day conditions.

The windshield survey of the study area was conducted by Ms. Sarah Doiron of AECOM on August 25, 2015. Ms. Doiron was accompanied by Mr. David Dunn of AECOM during the site visit. Readily visible and publicly accessible portions of the Site and surrounding properties were examined for the presence of areas of potential environmental concern (APEC). Individual land parcels were not investigated during the survey.

During AECOM's windshield survey, no visual evidence of water wells, monitoring wells, dry wells, clarifiers, or septic tanks or leach fields was observed and no visual evidence of discolored soil, water, or unusual vegetative conditions or odours was observed. Individual properties were not investigated to determine the presence or absence of the features described above.

5.2 Specific Observations at the Phase One Property

The Site occupies a rectangular 2.4 km long stretch running north-south along Creditview Road and extending approximately 150 metres to the east and west of Creditview Road, all located in Mississauga, Ontario. At the time of the windshield survey, there was varied land use throughout the study area.

The north portion of the Site, north of Highway 401, consists of residential, undeveloped, and commercial/industrial land uses. A residential subdivision is present on Old Creditview Road. Undeveloped land, covered by grass, is present between east of Creditview Road to Highway 401. Two large industrial/commercial warehouses are present on the west side of Creditview Road. These buildings are currently occupied by SCI Logistics (6780 Creditview Road), and have large paved parking lots on the east of the buildings.

Creditview Road extends over Highway 401 via a two lane bridge. Undeveloped land, with grass and tree covering is present south of Highway 401 on the east side of Creditview Road. A landscaped boulevard is observed along

the west side of Creditview Road to Argentia Road. An Enbridge Gas pumping station is located at the northwest corner of Argentia Road and Creditview Road. Campobello Road is located west of Creditview Road, and is accessed via Argentia Road. Commercial/industrial properties noted on Argentia Road and Campobello Road on the Site are outlined in Table 6 below.

Table 6. Summary of Commercial/Industrial Properties

Address	Occupant	Description
6800 Campobello Road	Office Building	Two storey office building, occupant(s) unknown
6780 Campobello Road	Dairy Farmers of Ontario	Commercial/industrial building
6760 Campobello Road	Gyptech Manufacturing	Industrial/manufacturing facility
6740 Campobello Road	Maxxam Analytics	Commercial/industrial laboratory
6747 Campobello Road	Icynene Inc.	Industrial/manufacturing facility
6743 Campobello Road	PCL Construction	Property under construction by PCL

Residential properties are present south of Argentia Road. Construction of a west trunk sanitary sewer by the Region of Peel was observed on the east side of Creditview Road, directly across from Argentia Road.

The central section of the Site from Argentia Road, south to Kenninghall Boulevard is a mix of residential and undeveloped land use. Residential subdivisions are present to the west of Creditview Road, and parcels of residential parkland were observed throughout. Undeveloped greenspace is found east of Creditview Road. The Credit River is present within the Site in this section, and runs north-south through the undeveloped greenspace. Creditview Road continues over the Credit River via a two lane bridge. Residential properties were observed south of this greenspace on Rivergate Place, Kenninghall Crescent, and Steen Drive.

The southern section of the Site, south of Kenninghall Boulevard to the southern site boundary (Sir Monty's Drive and Bancroft Drive) consists a mix of residential and undeveloped greenspace land use. Credit Meadows Park is located south of Kenninghall Boulevard, on the east side of Creditview Road. Riverrun Park is located south of Kenninghall Boulevard, on the west side of Creditview Road. A greenspace is present south of Kenninghall Boulevard, on both the east and west sides of Creditview Road. The Credit River turns and flows east-west through this greenspace. Residential subdivisions are found south of the greenspace, on both the east and west sides of Creditview Road.

Observation details are provided in Table 7.

Table 7. Specific Observations of Phase One Property

Area of Observation	Observations	Potential Environmental Concerns
Solid and Liquid Waste	<ul style="list-style-type: none"> Individual land parcels were not investigated as part of the survey. 	None identified
Wastewater Discharges, Drains and Sumps	<ul style="list-style-type: none"> Individual buildings in the Site were not investigated. 	None identified
Air Discharges	<ul style="list-style-type: none"> No potential environmental concerns were identified based on the process emissions or Certificate of Approval records. 	None identified
Storage Tanks	<ul style="list-style-type: none"> No underground storage tanks were identified within Site during the Windshield Survey. Two upright cylindrical aboveground storage tanks (ASTs) were observed at Maxxam Analytics. These tanks are located on the eastern side of the building, and can be seen from Campobello Road. The tanks are approximately 5 to 6 m tall, and appeared to be gas storage tanks. No other ASTs were observed within the Site. 	None identified

Table 7. Specific Observations of Phase One Property

Area of Observation	Observations	Potential Environmental Concerns
Spills and Staining	<ul style="list-style-type: none"> Individual buildings in the Site were not investigated. No spills or staining were observed during the site reconnaissance. 	None identified
Heating and Cooling Systems	<ul style="list-style-type: none"> Individual buildings in the Site were not investigated. 	None identified
Surface Features	<ul style="list-style-type: none"> Surface features of the Site vary throughout. The northern portion of the Site (north of Highway 401) has differentiating surface features east and west of Creditview Road. Grassland is found east of Creditview Road, and gradually slopes downward to the east, toward the Credit River. The land west of Creditview Road is relatively flat, and has both grass and paved coverings around the commercial/industrial property. The Site south of Highway 401 has similar surface features to the northern portion of the Site. Undeveloped greenspace is found east of Creditview Road, and slopes to the east toward the Credit River. West of Creditview Road (Campobello Road) is relatively flat, with mostly paved surfaces and surrounding lawns. The central section of the Site slopes to the south, toward the Credit River. The surface features of the subdivisions located both east and west of Creditview Road generally consist of paved streets and grass lawns, surrounding each residential property. The southern portion of Site has differentiating surface features north and south of the Credit River. Land north of the Credit River slopes downwards to the south. Land south of the Credit River slopes downward to the north, towards the Credit River. Greenspace surrounding the Credit River consists of both grass and forested areas. The subdivisions in the southern portion of the Site generally consist of paved streets and grass lawns surrounding each residential property. Land directly north and south of Highway 401 has a gradual downward slope to the highway. 	None identified
Hydraulic Equipment	<ul style="list-style-type: none"> Individual buildings within the Site were not investigated. 	None identified
Fill Materials	<ul style="list-style-type: none"> No obvious locations of fill activity were observed on Site. 	None identified
Wells	<ul style="list-style-type: none"> No wells were observed on the Site during the windshield survey. 	None identified
Hazardous Material	<ul style="list-style-type: none"> Individual properties in the Site were not investigated. 	None identified
Neighbouring Properties	<ul style="list-style-type: none"> North: Residential and undeveloped land use is found north of the Site. East: Undeveloped land surrounding the Credit River is found to the east of the Site. In the southern portion of the Site, residential properties are found to the east of the Site. South: A commercial plaza with several commercial tenants is located directly south of the Site. Occupants include a grocery store, coffee shop, dental office, and several fast food outlets. Two Petro-Canada branded gas stations are located south of the Site, located on the northeast and southwest corners of Creditview Road and Britannia Road; however, the gas station on the south side of Britannia Road is situated outside the study area. The gas station within the study area represent a potential PCA. West: Several commercial properties are present to the west of the Site, on Campobello Road and Argentia Road. These properties include two churches and a school, all located on Campobello Road. A commercial plaza is present west of the Site on Falconer Drive. Tenants include a convenience store, medical office, and a restaurant. Neighbouring properties to the west for the remainder of the study area consist of residential subdivisions. 	The gas station south of the Site represent PCAs for the Site.

5.2.1 Enhanced Investigation Property

The Site is not considered an advanced investigation property.

6. Review and Evaluation of Information

The Phase One property has differing land uses. APECs and PCAs associated with the Site are found in Tables 9 and 10.

There were no physical impediments encountered during the completion of the Limited Phase One ESA that would impact the findings of this report. However, it should be noted that the MOECC's Phase One ESA procedure is targeted at assessing individual properties. Due to the large number of properties being evaluated and the lack of permission to enter individual properties, this Limited Phase One ESA did not include interviews of site owners or occupants, or on-site inspections.

The Limited Phase One ESA was completed as part of the review of existing conditions for the EA Study.

6.1 Current and Past Uses

The Phase One Property is currently zoned for several different land uses. A Record of Site Condition ("RSC") filing with the MOE in accordance with O.Reg. 153/04 (as amended) would be required should land usage or zoning be changed in the future from a less sensitive to a more sensitive land use. The current and past uses of the Phase One Property are outlined below:

Prior to 1970:Agricultural and Undeveloped Land Use, and

1970s – Present:A mix of undeveloped, commercial, industrial, and greenspace/parkland, and residential land use.

6.2 Potentially Contaminating Activities

The MOECC has prepared a list of processes and operations that historically posed a higher risk of environmental impact, and which must be identified for if associated with the Site or properties within the 250 m buffer zone. The MOECC's list is referred to as "potentially contaminating activity", Table 2 of Schedule D of O.Reg 153/04.

Based on the information gathered during this Limited Phase One ESA, PCAs have been identified on the Site and/or within the 250 m buffer zone, as summarized in Tables 8 and 9 below. The location of these PCAs are indicated on Figure 4.

However, it should be noted that not all PCA will impact the Site or represent an Area of Potential Concern (APEC). For example, properties may have had recent environmental investigations confirming that there are no environmental impacts on the respective property, or may be so far hydraulically downgradient from the Site that they are unlikely to impact the Site. The following table identifies whether the PCAs represent an APEC, and if not, it provides that rationale for that conclusion.

A list PCAs within the Site are provided in Table 8 below. This list should be read in conjunction with Figure 4.

Table 8. Summary of Potentially Contaminating Activities Identified on the Site

PCA #	Address/Areas of Potential Environmental Concern	Potentially Contaminating Activity (as numbered in O.Reg 153/04)	Description of the Activity
A	6760 Campobello Road	34. Metal Fabrication	Historical metal fabrication: Rumble Automation 1994-1998
		57. Vehicles and Associated parts manufacturing	Historical vehicle stamping and motor vehicle gasoline engine and engine parts manufacturing: Tier Automotive 1986-2001
B	6780 Creditview Road	8. Chemical Manufacturing, Processing, and Bulk Storage	Historical Bulk Chemical Storage: CIBA Specialty Chemicals Canada Inc., GE BETZ Canada, Servi-Logistics Inc., 2002-2009
C	6820 Creditview Road	19. Electronic and Computer Equipment Manufacturing	Former Semiconductor and other electronic component manufacturing

A list of PCAs identified in the 250 m buffer zone are provided in Table 9 below. This list should be read in conjunction with Figure 4.

Table 9. Off-Site Potentially Contaminating Activities (PCAs)

PCA #	Address/Distance from Site	Potentially Contaminating Activity (as numbered in O.Reg 153/04)	Description of the Activity	Does it represent potential environmental risk?
D	6601 Falconer Drive (Approximately 250m west of the Site)	28. Gasoline and Associated Products storage in fixed tanks	Historical fuel storage	No, the property was developed into a residential complex, currently referred to as 6625 Falconer Drive. An RSC was filed for the property on June 9, 2009 as 6611 Falconer Drive, Mississauga. The property to the east is #6555 and the property to the west is # 6675. Based on aerial photographs, two buildings located on the property in the 2010 were demolished in by 2011. No CPU was issued.
		52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Historical auto garage	
E	6035 Creditview Road Approximately 250 m south of the Site)	28. Gasoline and Associated Products storage in fixed tanks	Petro Canada Gas Station	Yes
F	6108 St. Ives Street (Approximately 250 m west of the Site)	55. Transformer manufacturing, process, and use	No additional description available.	No. Based on site reconnaissance, the property is a residence. Based on internet search, an electrical contractor, with 2 employees uses the property as a home business. Based on aerial photograph review, the house was constructed between 1985 and 1989, and prior to that was part of an agricultural fields since at least 1944.
G	1605 Argentinia Road (Approx. 150 m west of the Site)	33. Metal Treatment, Coating, Plating and Finishing	Historical Platemaking	Yes
H	6616 Campobello Road (Approximately 250 m west of Site)	8. Chemical manufacturing, processing and bulk storage	Historical Chemical Storage. M & T Harshaw Ltd. 1992-1998	Yes
I	6660 Campobello Road (Approximately 250 m west of Site)	50. Soap and Detergent Manufacturing, Processing, and Bulk Storage	Historical soap/cleaning facility	Yes
J	6670 Campobello Road (Approximately 250 m west of Site)	19. Electronic and Computer Equipment Manufacturing	Brinkman Instruments	Yes
K	6680 Campobello Road (Approx. 210 m west of Site)	19. Electronic and Computer Equipment Manufacturing	Historical – Aimtronics Corporation	Yes
L	6690 Campobello Road (Approx. 200 m west of the Site)	33. Metals treatment, coating, plating and finishing - historical	Ionic Finishing: Historical coating of metal products	Yes

Table 9. Off-Site Potentially Contaminating Activities (PCAs)

PCA #	Address/Distance from Site	Potentially Contaminating Activity (as numbered in O.Reg 153/04)	Description of the Activity	Does it represent potential environmental risk?
M	6747 Campobello Road (Approx. 100 m west of the Site)	26. Foam and expanded foam manufacturing and processing Spill-680 Kg Polyol to ground Spill- Tetramethyliminobispropylamine 453.6 Kg	Icynene Inc., a manufacturer of spray foam insulation	Yes
N	1705 Argentia Drive (Approximately 200 m west of Site)	52. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Historical auto repair facility: 1979-2001	Yes
O	6085 Creditview Road (Approximately 200 m from the Site)	37. Operation of dry cleaning equipment (where chemicals are used)	Historical Dry Cleaning Facility: 2001. There was insufficient information to determine whether dry cleaning chemicals were actually used on site; however, as a conservative assumption, it is assumed chemicals were used on the site.	Yes
P	6660 Financial Drive (Approximately 50 from Site)	8. Chemical manufacturing, processing and bulk storage 47. rubber manufacturing and processing	Historical properties: Shell Chemicals Canada , Serviplast Inc.	Yes

6.3 Areas of Potential Environmental Concern

The APECs identified on the Site, and the PCAs within the 250 m buffer zone are summarized in **Table 10** below. Each of the APECs may have potentially resulted in impacts to soil and/or groundwater quality at the Phase One Property and shown graphically on Figure 4.

Table 10. Summary of Areas of Potential Environmental Concerns Identified on the Phase One Property

APEC #	Location of Area of Potential Environmental Concern	Potential Concerns	Contaminants of Potential Concern	Media Potentially Impacted
1	6760 Campobello Road	PCA-A Historical metal fabrication: Rumble Automation 1994-1998 Metal Fabrication [MOECC Sch. D classification 34]. Historical vehicle stamping and motor vehicle gasoline engine and engine parts manufacturing: Tier Automotive 1986-2001 Vehicles and Associated parts manufacturing [57]	Metals, VOCs Petroleum Hydrocarbons, VOCs, Metals	Soil, groundwater Soil, Groundwater
2	6780 Creditview Road	PCA-B Historical Bulk Chemical Storage: CIBA Specialty Chemicals Canada Inc., GE BETZ Canada, Servi-Logistics Inc., 2002-2009 Chemical Manufacturing, Processing, and Bulk Storage [8]	VOCs, Metals, Inorganics, PAHs	Soil, Groundwater

Table 10. Summary of Areas of Potential Environmental Concerns Identified on the Phase One Property

APEC #	Location of Area of Potential Environmental Concern	Potential Concerns	Contaminants of Potential Concern	Media Potentially Impacted
3	6820 Creditview Road	PCA-C Electronic and Computer Equipment Manufacturing, Former Semiconductor and other electronic component manufacturing [19]	Metals, VOCs	Soil, Groundwater
4	Along the western site border from 6820 Creditview Road to Highway 401	PCA-P Chemical manufacturing, processing and bulk storage [8] Rubber manufacturing and processing Historical properties: Shell chemicals Canada , Serviplast Inc. [47]	Metals, Inorganics, VOCs	Soil, Groundwater
5	Along the western site border from 6820 Creditview Road to 1551 Oran Court	PCAs-G, H, I, J, K, L, M, N Electronic and Computer Equipment Manufacturing[19], Metals treatment, coating, plating and finishing – historical [33], Foam and expanded foam manufacturing and processing [26], Operation of dry cleaning equipment (where chemicals are used) [37]. Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems) [52]	Metals, PAHs, Petroleum Hydrocarbons, VOCs	Soil, Groundwater
6	Along the southern site border from 6136 Camgreen Circle to 14446 Emerson Lane.	PCAs-E and O Gasoline and Associated Products storage in fixed tanks [28], Operation of dry cleaning equipment (where chemicals are used) [37]	Petroleum Hydrocarbons VOCs, PAHs	Soil, Groundwater

7. Conclusions

7.1 Phase Two Environmental Site Assessment Requirement

Based on the historical use of the Site and surrounding 250 m buffer zone, findings of the Limited Phase One ESA and the identified APECs at the Site, follow-up Phase Two ESA activities may be required by the City of Mississauga as part of its corporate due diligence policy practices and in support of the Schedule ‘C’ Class Environmental Assessment for road improvements. The objective of the Phase Two ESA will be to assess the presence or absence of potential contaminants of concern in soil and groundwater in each of the identified APECs through the completion of a staged work program consisting of, but not restricted to, borehole drilling, groundwater monitoring well installations, soil and groundwater sampling and analysis and assessment of the analytical results using current, applicable MOE generic site condition standards. Further, the Phase Two ESA should provide sufficient information to support the implementation of a risk assessment based approach to site restoration, if required.

However, it should be noted that the investigation discussed in this report is not complete and does not include interviews with owners or occupants and does not include physical inspections of each individual parcel of land. As such the purpose of this Limited Phase One ESA is for due diligence and not in support of the filing of a record of site condition. Therefore, further site investigations, as specified in O.Reg. 153/04, should be conducted prior to developing a scope of work for any Phase Two ESAs.

7.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

A RSC will not be filed based on the findings of this Limited Phase One ESA alone.

7.3 Qualifications of Assessors

The preparation of this Limited Phase One ESA report was supervised by a Qualified Person as defined in the Ontario Regulation 153/04 Records of Site Condition – Part XV.1 of the Environmental Protection Act (October 1, 2004, amended October 31, 2011).

Sarah Doiron, EPt – Document review and report preparation were conducted by Ms. Sarah Doiron, in the Markham, Ontario office. Ms. Doiron has been involved in undertaking Phase One ESAs, Phase Two ESAs, and remediation projects in Canada. Ms. Doiron is an Environmental Professional-in-Training (EPt) under ECO Canada. Ms. Doiron holds a B.Sc. in Biological Sciences, an Advanced Diploma in Environmental Technology, and over two years of professional experience.

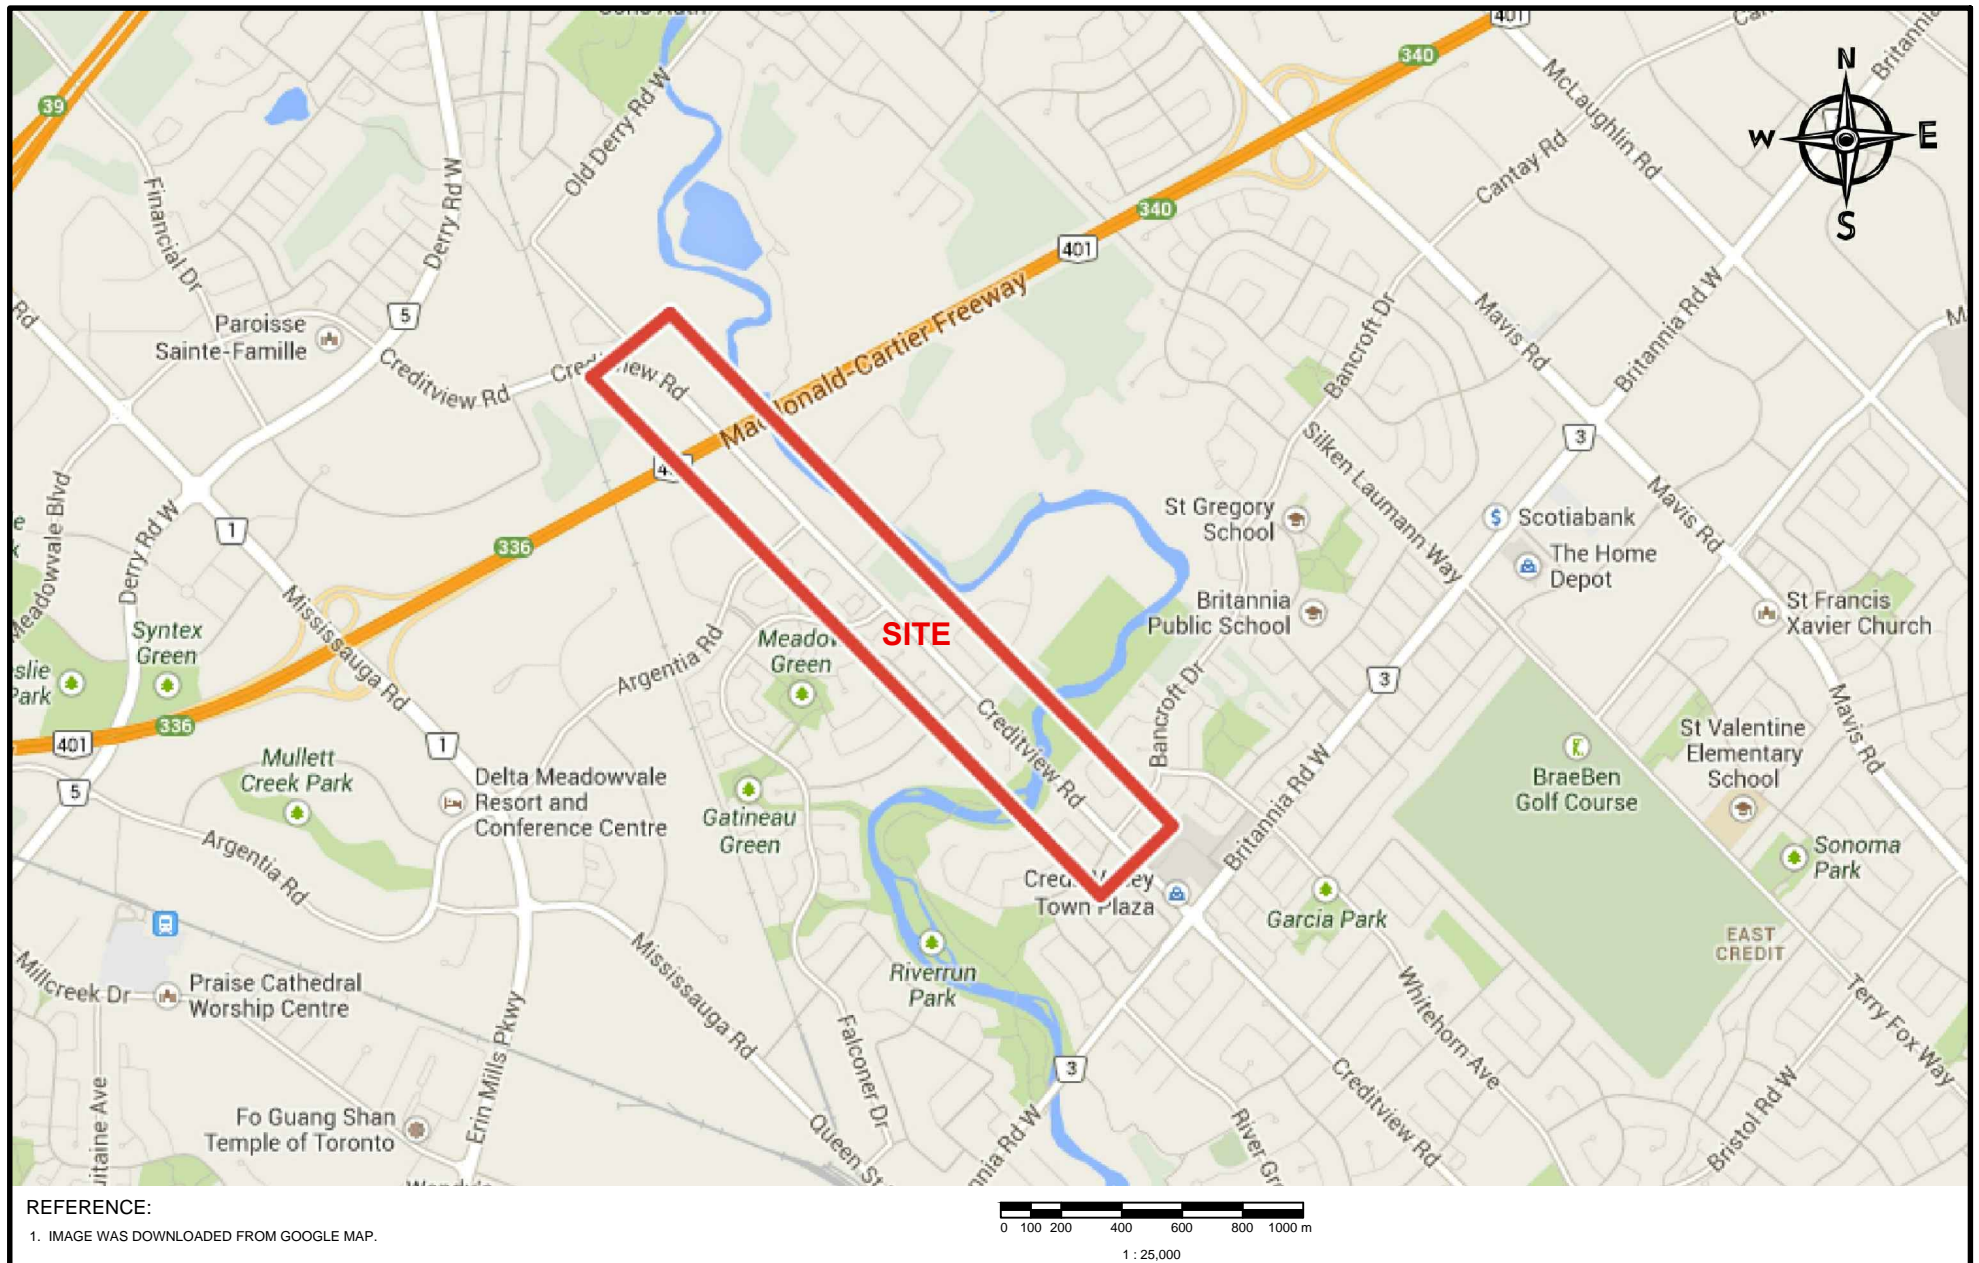

Peter Top, P. Eng. QP (ESA-O Reg 153-04) – Document review and report preparation were conducted in part by Mr. Peter Top. Mr. Top is experienced in the preparation, execution and management of a wide array of environmental investigations with focus on the following areas: Contaminant Overview Studies and Phase I environmental site assessments (ESAs), and has over 20 years of professional experience.

Marie Wardman, P. Eng. QP (ESA-O Reg 153-04) – Report review was completed by Ms. Marie Wardman. Ms. Wardman is experienced with the preparation, execution and management of a wide array of environmental investigations and remediation projects, with focus on the following areas: Contaminant Overview Studies, Phase I and II environmental site assessments (ESAs), hydrogeological assessments, waste management and contaminant management plans and has over 16 years of professional experience.

To the Office of the Clerk, City of Mississauga:

**Regarding: Freedom of Information Search Request
Creditview Road, Mississauga, ON**

AECOM is conducting a Phase I Environmental Site Assessment on the property surrounding part of **Creditview Road, Mississauga, ON**. Legal land descriptions of the locations of interest are below:

Lot	Concession	Description
6	3	CON 3 West of Centre Road of Hurontario St.
7	3	CON 3 West of Centre Road of Hurontario St.
8	3	CON 3 West of Centre Road of Hurontario St.
9	3	CON 3 West of Centre Road of Hurontario St.
10	3	CON 3 West of Centre Road of Hurontario St.
6	4	CON 4 West of Centre Road or Hurontario St.
7	4	CON 4 West of Centre Road or Hurontario St.
8	4	CON 4 West of Centre Road or Hurontario St.
9	4	CON 4 West of Centre Road or Hurontario St.
10	4	CON 4 West of Centre Road or Hurontario St.

Please provide the following information that may be on file with the City of Mississauga for the subject property, as per the Municipal Freedom of Information and Protection to Privacy Act (MFOIPP):

- Any building department records pertaining to property improvements including tank installations and removals
- Any heritage/historical land use concerns (environmental) pertaining to the subject properties
- Any record of a waste disposal site on the subject properties
- Environmental compliance convictions regarding spills and/or discharges to sanitary sewers
- Sewer records
- Records of orders or complaints pertaining to properties/on-Site facilities

- Any other concerns pertaining to environmental status of the subject properties

Please find a cheque for the amount of \$5.00 enclosed to cover the associated search fees. If you have any questions, please contact me at 613-820-8282 Ext: 247.

Sincerely,

AECOM Canada Ltd.

Dear Jillian Lackey:

RE: ***Freedom of Information and Protection of Privacy Act Request***
Our File # A-2013-06397, Your Reference

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to Lots 6, 7, 8, 9, 10 Con 3 & 4, Mississauga.

After a thorough search through the files of the Ministry's Halton-Peel District Office, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment. This file is now closed.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Ayesha Kapadia at 416-212-8912 or ayesha.kapadia@ontario.ca.

Yours truly,

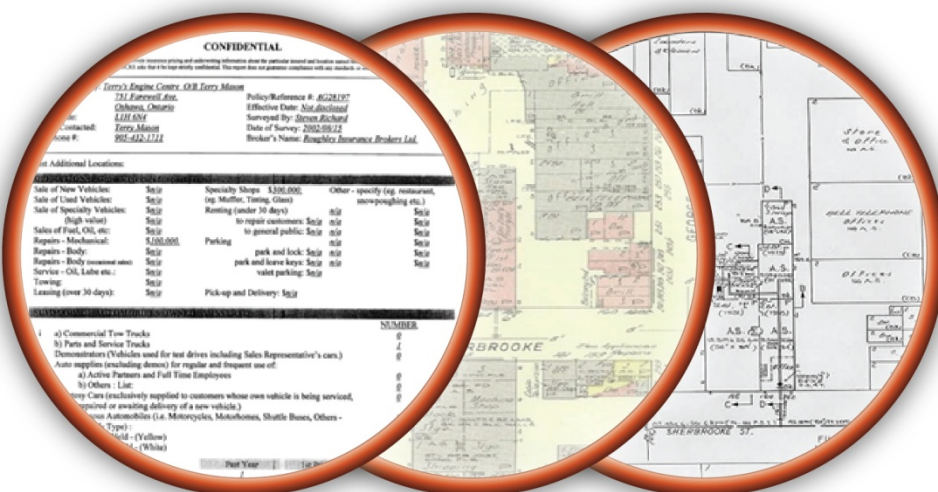

Heidi Ritscher
FOI Manager

Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase 1 Environmental Site Assessment but is solely intended to be used to focus further investigation.

Licence for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your licence to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by EcoLog Environmental Risk Information Services Ltd ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavoured to present you with information that is accurate, EcoLog ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of EcoLog ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by EcoLog ERIS Ltd. Copyright in data used in the Service or Report(s) (the "Data") is owned by EcoLog ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of EcoLog ERIS.

Executive Summary

Property Information:

Project Property: *Un-named
Creditview Rd Mississauga ON*

Order Information:

Order No.: *20131029013*
Date Requested: *06/11/2013*
Requested by: *Aecom*
Report Type: *Custom-Build Your Own Report*

Additional Products:

Aerial Photographs *National Collection - Digital (PDF)*

Incident ID: 2632210
 Incident Number: 475926
 SR Type: FS-Pipeline Incident
 Status Code: Pipeline Damage Reason Est
 Summary: 1562 Oran Court, Mississauga - 1/2" Pipeline Hit
 Spills Action Centre:
 Reported By: Vito Imineo - Enbridge
 Affiliation: Industry Stakeholder (Licensee/Registration/Certificate Holder, Facility Owner, etc.)
 Method Details: Utility damage
 Fuel Category: Heating Fuel
 Fuel Occurrence Type: Pipeline Strike
 Date of Occurrence: 8/5/2010 0:00
 Occurrence Start Date: 12/7/2010 0:00
 Health Impact: No
 Occurrence Desc: Imprudent Excavation
 Environment Impact: No
 Property Damage: No
 Service Interrupt: Yes
 Fuel Type: Natural Gas
 Enforce Policy: Yes
 Operation Type: Private Dwelling
 Damage Reason: Facility was not located or marked
 Public Relation: No

Appendix: Database Descriptions

Ecolog Environmental Risk Information Services Ltd can search the following databases. The extent of Historical information varies with each database and current information is determined by what is publicly available to Ecolog ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory: Up to Sept 2002 Provincial [AAGR](#)
The MAAP Program maintains a database of all abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.

Aggregate Inventory: Up to Aug 2012 Provincial [AGR](#)
The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. Please note that the database is only referenced by lot/concession and city/town location. The database provides information regarding the registered owner/operator, location, status, licence type, and maximum tonnage.

Abandoned Mine Information System: 1800-Feb 2013 Provincial [AMIS](#)
The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Anderson's Waste Disposal Sites: 1860s-Present Private [ANDR](#)
The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Automobile Wrecking & Supplies: 2001-Jun 2010 Private [AUWR](#)
This database provides an inventory of all known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Borehole: 1875-Aug 2011 Provincial [BORE](#)
A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Certificates of Approval:

1985-Oct 30, 2011*

Provincial

[CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Commercial Fuel Oil Tanks:

1948-Apr 2013

Provincial

[CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Chemical Register:

1992, 1999-Jun 2010

Private

[CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Inventory of Coal Gasification Plants and Coal Tar Sites:

Apr 1987 and Nov 1988*

Provincial

[COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Compliance and Convictions:

1989-Jun 2013

Provincial

[CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Certificates of Property Use:

1994-Jul 2013

Provincial

[CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Drill Hole Database:

1886-Jun 2013

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Environmental Activity and Sector Registry:

Oct 31, 2011-Jul 2013

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Environmental Registry:

1994-Jul 2013

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Environmental Compliance Approval:

Oct 31, 2011-Jul 2013

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For CofA's prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Environmental Effects Monitoring:

1992-2007*

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

ERIS Historical Searches:

1999-Mar 2013

Private

[EHS](#)

EcoLog ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Environmental Issues Inventory System:

1992-2001*

Federal

[EIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

List of TSSA Expired Facilities:

Current to Feb 2012

Provincial

[EXP](#)

This is a list of all expired facilities that fall under the TSSA (TSSA Act & Safety Regulations), including the six regulations that exist under the Fuels Safety Division. It will include facilities such as private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. These tanks have been removed and automatically fall under the expired facilities inventory held by TSSA.

Federal Convictions:

1988-Jun 2007*

Federal

[FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Contaminated Sites on Federal Land:

June 2000-Jan 2013

Federal

[FCS](#)

The Federal Contaminated Sites Inventory includes information on all known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Fisheries & Oceans Fuel Tanks:

1964-Sept 2003

Federal

[FOFT](#)

Fisheries & Oceans Canada maintains an inventory of all aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Fuel Storage Tank:

Current to Jun 2011

Provincial

[FST](#)

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Ontario Regulation 347 Waste Generators Summary:

1986-Apr 2012

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

TSSA Historic Incidents:

2006-June 2009

Provincial

[HINC](#)

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Indian & Northern Affairs Fuel Tanks:

1950-Aug 2003*

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of all aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

TSSA Incidents:

June 2009-Apr 2013

Provincial

[INC](#)

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Landfill Inventory Management Ontario:

2012

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Canadian Mine Locations:

1998-2009

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Mineral Occurrences:

1846-Apr 2013

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the planimetric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

National Analysis of Trends in Emergencies System (NATES):

1974-1994*

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Non-Compliance Reports:

1992(water only), 1994-2010

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

<u>National Defence & Canadian Forces Fuel Tanks:</u>	Up to May 2001*	Federal	NDFT
The Department of National Defence and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.			
<u>National Defence & Canadian Forces Spills:</u>	Mar 1999-Aug 2010	Federal	NDSP
The Department of National Defence and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.			
<u>National Defence & Canadian Forces Waste Disposal Sites:</u>	2001-Apr 2007*	Federal	NDWD
The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.			
<u>National Environmental Emergencies System (NEES):</u>	1974-2003*	Federal	NEES
In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for all previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.			
<u>National PCB Inventory:</u>	1988-2008*	Federal	NPCB
Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. All federal out-of-service PCB containing equipment and all PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites.			
<u>National Pollutant Release Inventory:</u>	1993-2011	Federal	NPRI
Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.			
<u>Oil and Gas Wells:</u>	1988-Jun 2013	Private	OGW
The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com .			

Ontario Oil and Gas Wells:

1800-Jul 2013

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, well cap date, licence no., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Inventory of PCB Storage Sites:

1987-Oct 2004

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Orders:

1994-Jul 2013

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Canadian Pulp and Paper:1999, 2002, 2004, 2005,
2009

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Parks Canada Fuel Storage Tanks:

1920-Jan 2005*

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of all known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Pesticide Register:

1988-Jun 2013

Provincial

[PES](#)

The Ontario Ministry of Environment maintains a database of all manufacturers and vendors of registered pesticides.

TSSA Pipeline Incidents:

June 2009-Mar 2012

Provincial

[PINC](#)

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Private and Retail Fuel Storage Tanks:

1989-1996*

Provincial

[PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Permit to Take Water:

1994-Jul 2013

Provincial

[PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Ontario Regulation 347 Waste Receivers Summary: 1986-2011 Provincial [REC](#)
 Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Record of Site Condition: 1997-Sept 2001, Oct 2004-Jun 2013 Provincial [RSC](#)
 The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Retail Fuel Storage Tanks: 1999-Jun 2010 Private [RST](#)
 This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Scott's Manufacturing Directory: 1992-Mar 2011 Private [SCT](#)
 Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Ontario Spills: 1988-Aug 2012 Provincial [SPL](#)
 This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Wastewater Discharger Registration Database: 1990-2011 Provincial [SRDS](#)
 Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Anderson's Storage Tanks: 1915-1953* Private [TANK](#)
 The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Transport Canada Fuel Storage Tanks: 1970-Mar 2007 Federal [TCFT](#)
 With the provinces of BC, MB, NB, NF, ON, PE, and QC; Transport Canada currently owns and operates 90 fuel storage tanks. Our inventory provides information on the site name, location, tank age, capacity and fuel type.

TSSA Variances for Abandonment of Underground Storage Tanks:

Current to Jun 2013

Provincial

[VAR](#)

The TSSA, Under the Liquid Fuels Handling Code and the Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, you may apply to seek a variance from this code requirement. This is a list of all variances granted for abandoned tanks.

Waste Disposal Sites - MOE CA Inventory:

1970-Jul 2013

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Up to Oct 1990*

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Water Well Information System:

1955-May 2013

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries". All values are an approximation.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property, within the report search radius, and the surrounding area outside the search radius.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red upside down triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and were included as reference.
