

The City of Mississauga, in partnership with the Region of Peel, has completed a Municipal Class Environmental Assessment (Class EA) study and preliminary design for the section of Mavis Road from Courtneypark Drive West, in the City of Mississauga, to Ray Lawson Boulevard, in the City of Brampton. The Study was conducted in accordance with the planning and design process for 'Schedule C' projects as outlined in the Municipal Engineers Association *Municipal Class Environmental Assessment* document, as amended in 2015, which is approved under the *Ontario Environmental Assessment Act*.

The study was undertaken to investigate the need for additional north-south capacity and address current and future needs to best serve a variety of users including motorists, transit users, pedestrians and cyclists. A context sensitive design approach was used in recognition of the multi-modal transportation needs of the area while protecting the established residential community and businesses.

The Preferred Design for Mavis Road generally includes the following key elements:

- Widening Mavis Road to 6 through-lanes;
- Reducing the posted speed from 70km/hr to 60 km/hr in the City of Mississauga;
- A sidewalk (east side) and multi-use trail (west side);
- Widening the Highway 407 Bridge to accommodate the additional lanes, sidewalk and multi-use trail;
- No impacts to natural features within the Fletcher's Creek valley;
- Intersection improvements;
- A southbound transit queue jump lane at Derry Road West intersection; and
- Streetscape/landscape mitigation and enhancements.

The Environmental Study Report (ESR) has been prepared to document the planning and decision-making process for this study. By this Notice, the ESR is being placed on the public record for a thirty (30) day review period from and including June 6 to July 5, 2017 at the following locations and through the website www.mississauga.ca/mavisroadea:
