Employment Lands

Land Use Policies

- Municipalities control land use by means of an Official Plan addressing transportation, population densities, park and recreational needs and the location of business parks and commercial centres.
- The Mississauga Official Plan uses a comprehensive zoning by-law which defines specific uses for the developed and undeveloped lands in Mississauga. The Mississauga Plan also includes a set of character area plans outlining detailed policies for specific planning districts.
- Lands designated Business Employment and Industrial are found within the employment areas, corporate centres, downtown and special purpose areas.
- Lands associated with the Toronto Pearson International Airport are not included as they are federal government lands.

- Due to continual changes in the office market, the City does not monitor vacancy rates or lease rates but relies on information supplied by the real estate community.
- Boundaries used by the real estate community are based on office concentration areas and not based on municipal boundaries or municipal geographical districts found in other inventories. It should also be noted that not all realtors use the same concentration area boundaries.
- The charts above contain data for office areas that may extend beyond the municipal boundaries of the City of Mississauga.
- The total square footage, available space and vacancy rate represents “office space” but may not be located within an “office building”.
- The information in the charts above depict vacancy and lease rates and are intended to be a guideline only.
