- The results of the five major data topics (Population and dwelling counts, Age and sex, Families, Households and Marital Status, Structural type of dwelling and Collectives and Language) were released throughout 2012
- The results of the NHS were released throughout 2013. The data topics included: Aboriginal peoples, Immigration and ethnocultural diversity, Education and labour, Mobility and migration and Income and housing

The 2011 Census of Population and the 2011 National Household Survey (NHS) both provide information on the Canadian population for various levels of geography and for numerous common topics (e.g., demography, marital status, family and language) including characteristics associated to these topics. It is possible that differences exist between the 2011 Census count and the NHS estimate.
