

2011 CENSUS & NHS RESULTS MALTON PROFILE

INTRODUCTION

The Malton community is a well-established, residential, stable area located in the northeast quadrant of the city, largely separated from other residential areas of Mississauga by the Toronto Lester B Pearson International Airport and numerous employment areas. Malton is not only unique in its location but also has a rich history and unique community profile in terms of socio-economics, ethnicity, immigrants and visible minority population.

The following publication summarizes demographic, social and economic data collected in the 2011 Census of Canada and National Household Survey for the Malton Community Node and Malton Neighbourhood.

- The 2011 Census was conducted in May of 2011
- The 2011 Census consisted of a mandatory short-form census questionnaire and the inaugural National Household Survey (NHS) which replaced the mandatory long-form questionnaire
- The completion of the census is mandatory for all Canadians
- The results of the five major data topics (Population and dwelling counts, Age and sex, Families, Households and Marital Status, Structural type of dwelling and Collectives and Language) were released throughout 2012
- The results of the NHS were released throughout 2013. The data topics included: Aboriginal peoples, Immigration and ethnocultural diversity, Education and labour, Mobility and migration and Income and housing

The 2011 Census of Population and the 2011 National Household Survey (NHS) both provide information on the Canadian population for various levels of geography and for numerous common topics (e.g., demography, marital status, family and language) including characteristics associated to these topics. It is possible that differences exist between the 2011 Census count and the NHS estimate.
