DEVELOPMENT & DESIGN CONSTRUCTION HOARDING

CALLISTO COURT

THOMAS STREET

LEGEND

Tree Inventory

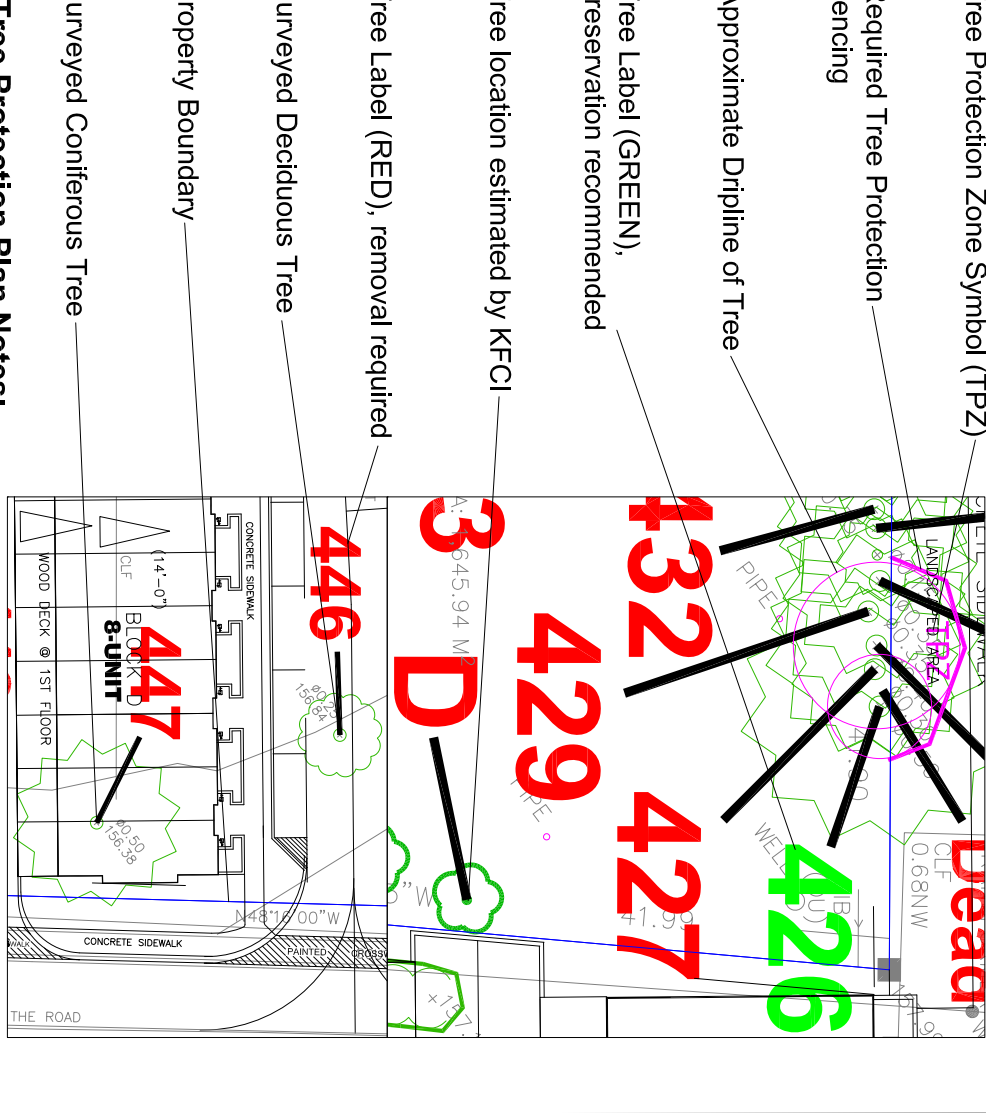

Refer to Table 1 of the report dated 09 August 2016 for tree inventory. Tree resources were located by topographic survey and measurements taken from known points in-field.

Tree Removals

The removal of 20 trees and one tree polygon will be required to accommodate the proposed development. The removal of an additional 16 trees is recommended due to their condition. Tree removals are indicated with RED labels.

Tree Preservation

Preservation of the remaining trees may be possible with appropriate tree protection measures. Trees identified for preservation are indicated with GREEN labels. Approximate dieline is indicated in MAGENTA. Refer to Table 1 for dieline distances. Refer to Tree Protection Plan Notes for preservation details.

Tree Protection Plan Notes:

1. All existing trees, which are to remain, shall be fully protected with hoarding to City standards, erected beyond their "drip line" prior to the issuance of the Erosion and Sediment Control Permit, to the satisfaction of the Community Services Department. Groups of trees and other existing plantings to be protected, shall be treated in a like manner with hoarding around the entire clump(s). Areas within the protective fencing shall remain undisturbed and shall not be used for the storage of building materials or equipment.
2. No rigging cables shall be wrapped around or installed in trees. Surplus soil, equipment, debris or materials shall not be placed over root systems of the trees within the protective fencing. No contaminants will be dumped or flushed where feeder roots of trees exist.
3. The developer or his/her agents shall take every precaution necessary to prevent damage to trees or shrubs to be retained.
4. Where limbs or portions of trees are removed to accommodate construction work, they will be removed carefully in accordance with accepted arboricultural practices.
5. Where root systems of trees are exposed directly adjacent to or damaged by construction work, they shall be trimmed neatly and the area backfilled with appropriate material to prevent desiccation.
6. Where necessary, the trees will be given an overall pruning to restore the balance between roots and top growth or to restore the appearance of the trees.
7. Trees that have died or have been damaged beyond repair, shall be removed and replaced by the owner at the developer's own expense with trees of a size and species as approved by the Community Services Department.
8. If grades around trees to be protected are likely to change, the owner shall be required to take such precautions as dry weeding, retaining walls and root feeding, to the satisfaction of the Community Services Department.
