Table 5b
Summary of Soil Analytical Results - Volatile Organic Compounds
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
s11	Standard is applicable to 1,3-Dichloropropene, and the individual isomers (cis + trans) should be added for comparison.
BI	Detection limit was raised due to background interferences.
HI	Detection limit was raised due to hydrocarbon interference.
IB	The detection limit was raised due to instrument background.
LI	The detection limit was raised due to laboratory background.
MI	Detection limit was raised due to matrix interferences.
TG	Detection limit was raised due to hydrocarbon interferences. Lower detection limit was not achievable.
VP	Detection limits was raised due to background interference.
XI	Detection limit was raised due to interference from coeluting o-xylene.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤50%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Table 6a
Summary of Soil Analytical Results Exceedances - Polycyclic Aromatic Hydrocarbons
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
[2]	Standard is for benzo(b)fluoranthene; however, the analytical laboratory can not distinguish between benzo(b)fluoranthene and benzo(j)fluoranthene, and therefore, the result is a combination of the two isomers, against which the standard has been compared.
[3]	Standard is applicable to both 1-methylnaphthalene and 2-methylnaphthalene, with the provision that if both are detected the sum of the two must not exceed the standard.
DB	Due to the sample matrix, sample required dilution. Detection limit was adjusted accordingly.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Table 6b
Summary of Soil Analytical Results - Polycyclic Aromatic Hydrocarbons
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
[2]	Standard is for benzo(b)fluoranthene; however, the analytical laboratory can not distinguish between benzo(b)fluoranthene and benzo(j)fluoranthene, and therefore, the result is a combination of the two isomers, against which the standard has been compared.
[3]	Standard is applicable to both 1-methylnaphthalene and 2-methylnaphthalene, with the provision that if both are detected the sum of the two must not exceed the standard.
DB	Due to the sample matrix, sample required dilution. Detection limit was adjusted accordingly.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Table 7a
Summary of Soil Analytical Results Exceedances - Acid/Base Neutrals
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
[s13]	The criterion is applicable to the total sum of 2,4 & 2,6-Dinitrotoluene, and the individual isomers (2,4 & 2,6) should be added for comparison.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Table 7b
Summary of Soil Analytical Results - Acid/Base Neutrals
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS [A]	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS) Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
[s13]	The criterion is applicable to the total sum of 2,4 & 2,6-Dinitrotoluene, and the individual isomers (2,4 & 2,6) should be added for comparison.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Notes:

Ontario SCS [A]	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS) Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

A	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
s16	For surface soil, the boron standard is for hot water soluble extract. For subsurface soil, the standard is for total boron (mixed strong acid digest), as ecological criteria are not considered.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
