Table 9b
Summary of Soil Analytical Results - Metals
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
A	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
s16	For surface soil, the boron standard is for hot water soluble extract. For subsurface soil, the standard is for total boron (mixed strong acid digest), as ecological criteria are not considered.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Notes:

Ontario SCS [A]	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS) Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
s12	The criteria for pH in surface soils (0 to 1.5 m) is 5 - 9, whereas the criteria for pH in sub-surface soils (> 1.5 m depth) is 5 - 11.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Table 10b
Summary of Soil Analytical Results - pH, Cyanide (free), EC and SAR
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
s12	The criteria for pH in surface soils (0 to 1.5 m) is 5 - 9, whereas the criteria for pH in sub-surface soils (> 1.5 m depth) is 5 - 11.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
A	Table 3 - Residential / Parkland / Institutional Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
s14	Standard is applicable to total PCBs, and the individual Aroclors should be added for comparison.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤40%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.

Table 12
Summary of Groundwater Analytical Results - Benzene, Toluene, Ethylbenzene, and Xylene
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface
***	Denoted as TH1602B in laboratory certificate of analysis.
NA	Not available

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
n/v	No standard/guideline value.
-	Parameter not analyzed / not available.
s7	Standard is applicable to PHC in the F1 range minus BTEX.
s8	Standard is applicable to PHC in the F3 range, minus PAHs (other than naphthalene). If PAHs were not analyzed, the standard is applied to F3.
s10	If baseline is not reached during F4 analysis, then gravimetric analysis is to be performed, and the standard is applied to the higher of the two results.
s15	Standard is applicable to PHC in the F2 range minus naphthalene. If naphthalene was not analyzed, the standard is applied to F2.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface
***	Denoted as TH1602B in laboratory certificate of analysis.
NA	Not available
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes

Table 14
Summary of Groundwater Analytical Results - Volatile Organic Compounds
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS [A]	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS) Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
[s11]	Standard is applicable to 1,3-Dichloropropene, and the individual isomers (cis + trans) should be added for comparison.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface
***	Denoted as TH1602B in laboratory certificate of analysis.
NA	Not available

Table 15
Summary of Groundwater Analytical Results - Polycyclic Aromatic Hydrocarbons
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
[2]	Standard is for benzo(b)fluoranthene; however, the analytical laboratory can not distinguish between benzo(b)fluoranthene and benzo(j)fluoranthene, and therefore, the result is a combination of the two isomers, against which the standard has been compared.
[3]	Standard is applicable to both 1-methylnaphthalene and 2-methylnaphthalene, with the provision that if both are detected the sum of the two must not exceed the standard.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface

Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
A	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
s13	The criterion is applicable to the total sum of 2,4 & 2,6-Dinitrotoluene, and the individual isomers (2,4 & 2,6) should be added for comparison.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface

Table 18
Summary of Groundwater Analytical Results - Metals
Port Credit Brownfield Redevelopment, 70 Mississauga Road South, Port Credit, Ontario
Port Credit West Village Partners L.P.

Notes:

Ontario SCS [A]	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS) Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
MI	Detection limit was raised due to matrix interferences.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤20%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
-	Parameter not analyzed / not available.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤20%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface

Notes:

Ontario SCS	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS)
[A]	Table 3 - All Types of Property Use - Medium Fine Textured Soils
6.5[A]	Concentration exceeds the indicated standard.
15.2	Measured concentration did not exceed the indicated standard.
< 0.50	Laboratory reporting limit was greater than the applicable standard.
< 0.03	Analyte was not detected at a concentration greater than the laboratory reporting limit.
[s14]	Standard is applicable to total PCBs, and the individual Aroclors should be added for comparison.
RPD	Relative Percent Difference.
61%	RPD exceeds data quality objective of ≤30%.
nc	RPD is not calculated if one or more values is non detect or if one or more values is less than five times the reportable detection limit.
m bgs	metres below ground surface
***	Denoted as TH1602B in laboratory certificate of analysis.

Table 21
Soil Analytical Maximum Concentration Data

11096-82-5	Aroclor 1260	-	5	n/v	µg/L	103	119	-	-	0	0		X	N/A	N/A	N/A
1336-36-3	Polychlorinated Biphenyls (PCBs)	-	5	15	µg/L	103	119	-	-	0	0	X			X	No

Notes:

Ontario SCS [A]	Soil, Ground Water and Sediment Standards for Use under Part XV.I of the Environmental Protection Act (MOE, 2011) Site Condition Standards (SCS) Table 3 - All Types of Property Use - Medium Fine Textured Soils
	Contaminant of Concern
-	Parameter not analyzed / not available.
n/v	No standard/guideline value.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes
CAS	A unique numerical identifier assigned by the Chemical Abstracts Services to a chemical substance.
