# 2020 Residential Highlights

## KEY FACTS

**125,458**

residential units included in this directory

**65.5%**

of units are apartments

**30.3%**

of units are townhouses

**2.4%**

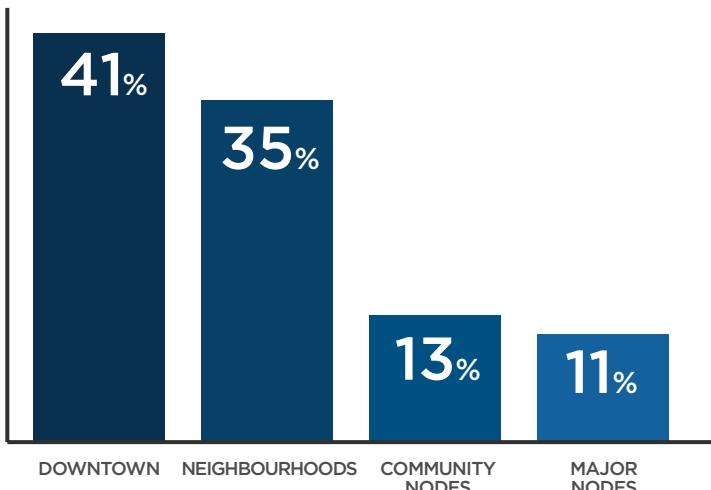

of units are residential institutions

**1.9%**

of units are mixed-use and other types of res

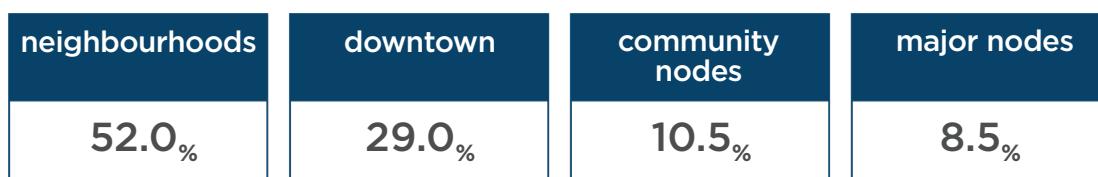

The Residential Directory includes only multi type residential units

### APARTMENT UNITS, BY CITY STRUCTURE

Of the City's total multi-residential units are located in Wards 3, 4 and 7

### TOTAL MULTI-RESIDENTIAL UNITS BY CITY STRUCTURE

### MULTI-RESIDENTIAL UNITS IN DOWNTOWN CHARACTER AREAS

CHARACTER AREA	APARTMENT UNITS	% OF APARTMENTS	TOWNHOUSE UNITS	% OF TOWNHOUSES	TOTAL MULTI-RESIDENTIAL UNITS	% OF TOTAL MULTI-RESIDENTIAL UNITS

# Introduction

The Residential Directory includes information on development that is built, under construction or for which a building permit has been issued as of December 31, 2019.

The directory is based on an inventory conducted by the City Planning Strategies Division and provides information on all residential multiple unit sites in the City of Mississauga. In the inventory, these sites are organized by the following building types: apartments, plexes, residential institutional buildings, buildings with residential and retail uses (classified as mixed RES/RET), townhouses, cluster or condominium detached, condominium semi-detached, and mobile homes.

Summary statistics based on unit type and geography (character areas) are also provided in this directory.

This data can be viewed on the [Planning Information Hub](#) and is also available through [Open Data](#).

## A Guide to Using this Data

This data is structured into three feature classes: Buildings, Centres, and Complexes. A feature class is a grouping of like items.

### **Buildings Feature Class:**

This feature class contains: apartments, plexes, residential institutions, and mixed-residential and retail (RES/RET) buildings.

### **Centres Feature Class:**

A centre generally represents a site where one or more buildings exist. In many cases when a development includes multiple buildings on one property, statistics provided through site plans or other sources are for the entire centre not for each building. The centre table provides data that are common for all buildings on the site (i.e. zoning, designation, etc.).

### **Complexes Feature Class:**

This feature class contains: on-street and condominium townhouses, detached and semi-detached condominium developments, and mobile homes. Typically complexes contain many blocks, often with one address for the entire site.

## Attributes:

The following is a description of each data attribute provided:

Attribute	Description
1. Centre ID or Complex ID	A unique number per site.
2. Building ID	A unique number per buildings within centres. This number is not provided for buildings within complexes.
3. Number of Z Area	Administrative areas in the city, created for mapping purposes.
4. Character Area	As provided by the Mississauga Official Plan. Please refer to the Mississauga Official Plan document for the most up to date source of this information.
5. Designation	Land use designation as provided by the Mississauga Official Plan. Please refer to the Mississauga Official Plan document for the most up to date source of this information.
6. Zoning	Zoning category (By-law 0225-2007). Please refer to the Zoning Bylaw official document for the most up to date source of this information.
7. Parking Spaces	Number of parking spaces assigned to all residential buildings included in the centre, or to the townhouse complex.
7. Building Name or Complex Name	Name given to the building or complex (e.g. Absolute World, City Gate), if a name exists. Not all complexes or buildings are named.
8. Address(es)	Address number for the building and street name. For some townhouse complexes multiple addresses with multiple street names are provided. In these cases address numbers are provided first, then names of streets respectively. These are the addresses as they existed at the time of capture. We do not necessarily maintain address changes.
9. Site Area (ha/ac)	The net site area of development as provided by the Site Plan or other sources. The net area does not include undevelopable land of the site (examples of undevelopable lands may include: lands below top of bank, a wood lot, or a road widening). Net site area is provided in hectares and acres.
10. GFA (m <sup>2</sup> /ft <sup>2</sup> )	Gross Floor Area (GFA) of a building. For the mixed type buildings: Res GFA (m <sup>2</sup> / ft <sup>2</sup> ) and Ret GFA (m <sup>2</sup> / ft <sup>2</sup> ).  Where available the Zoning By-law definition of GFA is reported, however, it is important to note that GFA definitions have changed over the years and GFA data were obtained from a number of different sources. In some instances, the data in the Residential Multiple Unit Inventory may not reflect zoning by-law definitions. The GFA for apartments, condominium townhouses and plexes is generally defined in the Zoning By-law as the total area of each floor above or below established grade, measured from the exterior of the outside walls excluding heating equipment, mechanical rooms, elevators, enclosed balconies, parking areas, common storage lockers, common laundry facilities, and common facilities such as recreational facilities that are not contained within an individual dwelling unit. The GFA definition for on-street townhouses is generally defined in the Zoning By-law as the total area of each floor above established grade, measured from the exterior of the outside walls, excluding any area used for parking. Gross Floor Area is provided in square meters and square feet.

11. Tenure	Generally describes the title under which property is held. For the mixed type buildings, residential and retail tenure are provided separately. All types of tenure included in this directory are listed under the definitions section of this report.
12. Storeys	Total number of storeys of the building. For townhouse complexes where there are two and three storey components, the highest number of storeys on site is presented.
13. Number of Units	Number of units for which building permit was issued. For the mixed type buildings, numbers of residential and retail units are indicated separately.
14. Number of Beds	Applies only to the residential institution type of buildings where number of units is not provided, rather number of beds (i.e. long term care dwelling).
15. Number of Townhouse Blocks	Typically a townhouse complex is comprised of multiple structures called blocks that occupy a site. This data element only applies to townhouse complexes.
16. Units per ha/ac	Density on the site.
17. FSI	Floor Space Index (FSI) – the ratio: GFA/Site Area. The ratio of the gross floor area of all buildings on a site to the net developable area of that site.

In some records estimates were made or information was not provided. This occurs in some older developments where the planning and building files were not available. In these cases some of the GFA figures, and subsequently FSI, were not available due to difficulty in obtaining this information. Similarly some of the site areas were estimated given the best information available at the time.

## Definitions

### Building types in this directory:

Residential Building Type	Description
Apartments	Five or more residential units usually sharing a common entrance. For the purposes of the Multiple Unit Inventory high rise apartment buildings with some retail uses at grade are also included in this category.
Townhouses	Three or more residential units joined by an above grade vertical wall with each unit usually having a private outdoor entrance. Includes "stacked", "horizontal multiple" developments.
Plexes	Units joined horizontally including duplexes, triplexes, and quadroplexes.
Residential Institutional	Includes retirement homes, long term care facilities, convents, and retreat centres.
Cluster Detached	Detached dwellings in a cluster or condominium arrangement.
Semi-Detached	Semi-detached dwellings in a condominium arrangement.

## Mixed RES/RET

Apartment units above commercial establishments in buildings with less than five storeys. Some of the apartment and townhouse buildings included in this directory also have a commercial component. Many high rise apartment buildings in the Downtown Core include retail uses at the ground level. In cases like this where the retail GFA is less than 10% of the total GFA, buildings are classified as apartments or townhouses. In other cases buildings are grouped into the Mixed RES/RET category. This includes mostly two or three storey buildings located in the areas which are designated in the Mississauga Official Plan as Mixed Use. For the Mixed RES/RET category buildings, GFA information on retail and residential portions are provided separately – Residential GFA and Retail GFA. For those buildings where the retail portion is relatively small, only total values for the GFA and number of units are provided and buildings are classified as apartments.

## Mobile Homes

A large house trailer, designated for year-round living in one place.

### Tenure in the Residential Directory:

Tenure	Description
Freehold	Dwelling unit and associated property privately owned.
Freehold – Common Element Condo	Dwelling unit with associated property privately owned and the road is condominium.
PCC	Peel Condominium Corporation.
CDM	Condominium Development Application in process.
RNTL	Market Rental.
RNTL – PNP	Rental Peel Non-Profit.
RNTL – PNPSC	Rental Peel Non-Profit Senior Citizens.
RNTL – PRIVNP	Rental Private Non-Profit.
RNTL – PRIVNPSC	Rental Private Non-Profit Senior Citizens.
COOP-FED	Co-operative under a Federal Jurisdiction.
COOP-ROP	Co-operative – Region of Peel.

## Statistics

The following tables present the breakdown of multi-residential units by character area.
