

NOTICE OF PUBLIC INFORMATION CENTRE

CREDIT VALLEY ROAD TRAFFIC CALMING

The City of Mississauga has recently begun implementing physical traffic calming measures in order to address local neighbourhood road safety issues in Mississauga.

Through an extensive review process, roadways are identified to receive physical traffic calming measures. Credit Valley Road between Winston Churchill Boulevard and Erin Mills Parkway has been selected as a location which would benefit from the installation of traffic calming measures.

What is Traffic Calming?

Traffic calming consists of physical measures (speed humps, speed cushions) put in place on the road in order to reduce the speed and volume of traffic and to restore neighbourhood roadways to their intended function.

At this time, staff would like to invite you to a public information centre which will provide background information on Traffic Calming including the proposed traffic calming measures for Credit Valley Road. The representatives from the City will be present to answer questions and discuss the details of the proposed plan and installation of traffic calming afterwards.

Date: Wednesday, May 22nd, 2019

Time: 6:30 p.m. to 8:30 p.m.

Location: Erin Meadows Community Centre-Multi-Purpose Room B

We are interested in your feedback in developing a traffic calming plan for your neighbourhood. If you are unable to attend the public information centre please take the time to provide us with your written comments regarding the proposed traffic calming measures on Credit Valley Road. **Please note that the final decision to proceed with the proposed traffic calming project will be based on the support received from the neighbourhood.**
