Attention: Mr. Ali Rafaqat

Dear Sir:

**Phase I Environmental Site Assessment
1108 Eglinton Avenue East
Mississauga, Ontario**

Please find enclosed our report 17-2982 regarding a Phase I Environmental Site Assessment (ESA) of the above-noted property. In summary, the environmental assessment did not reveal any significant environmental concerns that would impact on or restrict the current use or redevelopment of the property and no further investigation or work is required. The findings of the assessment are summarized below:

- (i) The property is located in an area of primarily commercial/light industrial land use on the south side of Eglinton Avenue East, west of Dixie Road at the termination of Maingate Drive in Mississauga, Ontario. The legal description of the property is "*Part of Lots 7 and 8, Concession 2, NDS, City of Mississauga, Municipality of Peel, Ontario*".
- (ii) The subject property measures approximately 1,855.98 m² (square metres) with a single family dwelling situated centrally on the site. The area surrounding the building is paved at the north side, gravel covered to the east with a grassed yard at the rear. A paved entranceway provides access to the property from Eglinton Avenue East at the north side of the site. The property boundaries are defined by: a municipal sidewalk then Eglinton Avenue East to the north, residential houses to the east and west, and vacant land then a commercial/light industrial complex to the south. The vicinity area is municipally serviced for water and sewers and any surface spills would likely be directed to the municipal sewer system with minimal impact on the property.

- (iii) The subject property is improved by a two-storey dwelling with one basement level. The building is heated by a natural gas-fired furnace located in the basement of the house. Interior finishes were comprised of carpet, hardwood or ceramic floor tiles with drywall or plaster walls. A single car garage is present south of the house.
- (iv) The subject property is used for residential purposes.
- (v) Aerial photographs from 1954, 1960, 1965, 1970, 1975, 1980, 1989, 2000, 2005, and 2010 were reviewed for the vicinity area from the City of Mississauga and Toronto Archives websites. In the 1954 photograph, the subject and vicinity properties were agricultural and no structures were present on the subject site. The dwelling was visible on the site from 1960 through to the 2010 photographs. In the 1960 to 1975 photographs, the properties to the south were undeveloped agricultural land. The commercial/industrial buildings to the north were visible in the 1975 and later photographs. The property to the west was vacant in all the photographs, and the house to the east was visible in the 1960 and later photographs.
- (vi) A search of the Suburban Toronto City Directories was undertaken dating from 2000 back to 1969 when the vicinity area was first listed. A residential house was listed at the subject property between 1977 and 1984. In 1989, Falconview Realty was listed at the subject site and then from 1994 to 2000 a residential tenant was listed.
- (vii) The adjacent properties were listed as residences and commercial/light industrial facilities similar to the current occupants since the early 1970s as noted below:
- **east:** Madesin General Contractors was listed from 1984 to 2000. A residential tenant was then listed since 1977.
 - **south:** A commercial/light industrial complex was listed at 1105 to 1135 Crestlawn Drive since 1990.
 - **west:** A residential house was listed at 1094 Eglinton Avenue East since 1977 until 1984. A demolition permit was issued for a residential dwelling in 1986.
 - **north:** 5015 and 5030 Maingate Drive were listed as commercial plazas with tenants similar to the current occupants since 1977.
- (viii) Building permits for the subject site were reviewed on the City of Mississauga No hazardous materials were noted to be present on the property on the day of inspection.

- (ix) website. Three permits were listed as follows:
- 1972, a pool and fence storage permit
 - 1987, a cancelled permit for a new industrial building
 - 2003, a sewer conversion permit for a detached dwelling
- (x) No substance containers were observed on the property on the day of inspection.
- (xi) No vent or fill pipes normally associated with underground storage tanks, nor any above ground storage tanks were noted on site on the day of inspection.
- (xii) It is possible that some of the electrical equipment in the building contain PCBs; however, it is likely that many of the fixtures would have been changed as part of on-going maintenance.
- (xiii) No evidence of waste storage or burial was apparent on the day of inspection.
- (xiv) No evidence of asbestos or asbestos containing materials was observed to be present on the day of inspection.
- (xv) The general area is comprised of impermeable clayey silt till and consequently, the groundwater is not overly susceptible to contamination from surface spills. Locally, it is inferred that shallow groundwater likely flows in a southwesterly direction toward Little Etobicoke Creek and it is unlikely that the current commercial land use of the upgradient properties to the northeast would have an adverse environmental impact on the subject property.

In summary, the Phase I environmental assessment did not reveal any significant environmental concerns that would impact on or restrict the current use or redevelopment of the property and no further investigation is required.

Thank you for the opportunity to have been of assistance.

Yours very truly,
TRY ENVIRONMENTAL SERVICES INC.

Robert Ostry, M.A., P.Eng.

DRAFT

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
1108 EGLINTON AVENUE EAST
MISSISSAUGA, ONTARIO**

1. INTRODUCTION

TRY Environmental Services Inc., was retained by Mr. Ali Rafaqat on behalf of Ali Motors, to carry out a Phase I ESA of the property located at 1108 Eglinton Avenue East in Mississauga. The site is currently occupied by a residential house.

The scope of this review is in support of financing or sale of the property where a Record of Site Condition (RSC) is not intended and generally conforms to the requirements outlined by the Canada Mortgage and Housing Corporation (CMHC) and the Canadian Standards Association (CSA) Standard Z768-01 for Phase I ESAs.

1.1 PURPOSE

The purpose of the assessment was to identify current and previous land use on or adjacent to the property which might be associated with potential sources of environmental concern. This preliminary assessment did not include sampling or testing.

1.2 SCOPE OF WORK/METHODOLOGY

The scope of the assessment entailed:

- (i) undertake a site visit on March 27, 2017
- (ii) interpret available historic aerial photographs
- (iii) search the suburban Toronto city directories to determine the previous occupancy history; a land title search was not undertaken as the required information was available through the directory search
- (iv) verify aspects of regulatory compliance with the Ministry of Environment and Climate Change (MOECC)
- (v) request a search by the Spills Action Centre (SAC) of any documented hazardous spills which may have occurred near the site
- (vi) request information from the Fuels Safety Division of the Technical Standards & Safety Authority (TSSA) regarding the registration of underground storage tanks

- (vii) search MOE documents regarding the potential historical use of the vicinity properties for waste disposal sites, coal gasification plant waste sites, industrial sites which produced or used coal tar and related tars, and PCB storage sites
- (viii) provide recommendations regarding the need for potential remedial action or further investigations

2. SITE DESCRIPTION

The property was visually inspected on March 27, 2017 by Ms. Melanie Ostry of TRY Environmental Services Inc.

2.1 LOCATION AND LEGAL DESCRIPTION

The property is located in an area of primarily commercial/light industrial land use on the south side of Eglinton Avenue East, west of Dixie Road at the termination of Maingate Drive in Mississauga, Ontario. The legal description of the property is "*Part of Lots 7 and 8, Concession 2, NDS, City of Mississauga, Municipality of Peel, Ontario*".

2.2 SITE AND AREA CHARACTERISTICS

The subject property measures approximately 1,855.98 m² (square metres) with a single family dwelling situated centrally on the site. The area surrounding the building is paved at the north side, gravel covered to the east with a grassed yard at the rear. A paved entranceway provides access to the property from Eglinton Avenue East at the north side of the site. The property boundaries are defined by: a municipal sidewalk then Eglinton Avenue East to the north, residential houses to the east and west, and vacant land then a commercial/light industrial complex to the south. The vicinity area is municipally serviced for water and sewers and any surface spills would likely be directed to the municipal sewer system with minimal impact on the property. The site location is shown on a survey of the general area presented as **Drawing 1** and photographs taken during the site inspection are presented in **Appendix A**.

2.3 DESCRIPTION OF IMPROVEMENTS

The subject property is improved with a two-storey dwelling with one basement level. The building is heated by a natural gas-fired furnace located in the basement of

the house. Interior finishes were comprised of carpet, hardwood or ceramic floor tiles with drywall or plaster walls. A single car garage is present south of the house.

2.4 PROPERTY USAGE AND ACTIVITIES

The subject property is used as a residential house.

2.5 ADJOINING AND SURROUNDING PROPERTY USES AND ACTIVITIES

The properties adjacent to the subject site are occupied as follows:

- **north:** - Eglinton Avenue East then 5030 Maingate Drive (commercial plaza with tenants including Office Furniture, Adams Door Systems, Pita and Grill, and Platinum Auto Parts)
- **east:** - 1120 Eglinton Avenue East (residential house)
- **south:** - 1105 to 1135 Crestlawn Drive (commercial/light industrial complex with tenants Lewke Construction, Collectcorp, Unique Auto Automotive, Town & Country, Golden Taxi, Dixie Kitchen, etc.)
- **west:** - vacant land at 1094 Eglinton Avenue East

3. RECORDS REVIEW

3.1 GEOLOGIC MAPS AND TOPOGRAPHY

According to information presented on Geological Survey Map P2204, Quaternary Geology of Toronto and the Surrounding Area, published by the Ministry of Natural Resources (1980), the subject site is situated in an area of relatively impermeable clayey silt till of the Halton Formation.

Review of the topographic map for the area (Map No. 30M/12) indicates that the regional topographic grade is to the southeast; however shallow groundwater flow in the vicinity is likely to the west-southwest toward Little Etobicoke Creek at a distance of approximately 125 metres (m).

3.2 AERIAL PHOTOGRAPHS

Aerial photographs from 1954, 1960, 1965, 1970, 1975, 1980, 1989, 2000, 2005, and 2010 were reviewed for the vicinity area from the City of Mississauga and Toronto Archives websites. In the 1954 photograph, the subject and vicinity properties were agricultural and no structures were present on the subject site. The dwelling was visible on the site from 1960 through to the 2010 photographs. In the 1960 to 1975 photographs, the properties to the south were undeveloped agricultural land. The commercial/industrial buildings to the north were visible in the 1975 and later photographs. The property to the west was vacant in all the photographs, and the house to the east was visible in the 1960 and later photographs.

3.3 OCCUPANCY SEARCH

A search of the Suburban Toronto City Directories was undertaken dating from 2000 back to 1969 when the vicinity area was first listed. A residential house was listed at the subject property between 1977 and 1984. In 1989, Falconview Realty was listed at the subject site and then from 1994 to 2000 a residential tenant was listed.

The adjacent properties were listed as residences and commercial/light industrial facilities similar to the current occupants since the early 1970s as noted below:

- **east:** Madesin General Contractors was listed from 1984 to 2000. A residential tenant was then listed since 1977.
- **south:** A commercial/light industrial complex was listed at 1105 to 1135 Crestlawn Drive since 1990.
- **west:** A residential house was listed at 1094 Eglinton Avenue East since 1977 until 1984. A demolition permit was issued for a residential dwelling in 1986.
- **north:** 5015 and 5030 Maingate Drive were listed as commercial plazas with tenants similar to the current occupants since 1977.

Building permits for the subject site were reviewed on the City of Mississauga website. Three permits were listed as follows:

- 1972, a pool and fence storage permit
- 1987, a cancelled permit for a new industrial building
- 2003, a sewer conversion permit for a detached dwelling

3.4 FIRE INSURANCE MAPS

Fire insurance plans for the Cooksville and Port Credit areas from 1939 and 1928, respectively, were available for review at the Metropolitan Toronto Reference Library for the vicinity area; however, the subject and vicinity properties were not covered on the plans.

3.5 ONTARIO MINISTRY OF THE ENVIRONMENT (MOE), SPILLS ACTION CENTRE (SAC) AND TECHNICAL STANDARDS & SAFETY AUTHORITY (TSSA)

A request was submitted to the MOE Freedom of Information and Protection of Privacy Office (**Appendix B**) in order to determine if there were any outstanding orders or violations associated with the property, whether any Control Orders have been issued; whether there have been any other environmental concerns associated with the property such as complaints, inspections, etc.; whether any environmental investigations have been carried out regarding the subject property; and to determine if SAC's files contain any reported spills that had occurred in the site vicinity. Note that the SAC's database dates back only to 1988 and many of the occurrences on file have only been reported voluntarily.

The TSSA was requested to review their computer database for the subject and adjacent properties with regard to registered underground storage tanks and above ground storage tanks containing petroleum products. A customer service advisor with the TSSA indicated that no tanks or removals had ever been registered for the property.

3.6 OTHER SOURCES

A review of the following documents indicated that no waste disposal sites, industrial coal tar sites, or coal gasification plants had ever been in the immediate vicinity (1 km) of the subject property:

- Waste Disposal Site Inventory - Ontario MOE, 1991
- Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario - Ontario MOE, 1988
- Inventory of Coal Gasification Plant Waste Sites in Ontario - Ontario MOE, 1987

The subject property was not listed in the Ontario PCB Site Inventory System (MOE, 2003). A review of the Ontario Regulation 347 Waste Generators Summary as referenced in the MOE Hazardous Waste Information System (HWIS) 2000 indicated that no waste generator sites were registered for the subject property. A number of registered

waste generators were listed at vicinity properties; however, it is unlikely that the subject property would be adversely impacted due to the location and separation distance from the subject site. The registered generators in the vicinity area are tabulated below.

Address	Occupant	Waste Generator Number	Waste Stream
1150 Eglinton Ave. E.	Magneto Electric Service Co.	ON0118000	213 – Petroleum Distillates 251 - Oil Skimmings & Sludges
1011 Eglinton Ave. E.	Select/Western Office Equipment	ON0624601	No information provided
1185 Eglinton Ave. E.	Ontario Sports & Recreation Centre	ON1449201	No information provided
1150 Eglinton Ave. E.	Canadian Waste Services	ON2160017	No information provided
1105 Crestlawn Dr., Unit 7	Tokar Hyde and Associates	ON1647800	No information provided
1105 Crestlawn Dr., Unit 1	Ontario Excavac Inc.	ON2338990	No information provided
5100 Maingate Dr., Unit 6	Dixie Thread Grinding	ON1301500	No information provided

A search of 50 databases (included in **Appendix C**) was conducted by EcoLog ERIS for information within a 250 m radius of the subject site. No records were found for the subject site. The following records were found for the surrounding properties:

- 2 automobile wrecking & supplies records
- 5 certificates of approval
- 4 environmental registry records
- 1 environmental compliance approval records
- 8 ERIS Historical Search records
- 7 List of TSSA Expired Facilities
- 64 Ontario Regulation 347 Waste Generators Summary records
- 1 TSSA Historic incidents
- 1 Private and Retail Fuel Storage Tanks record
- 86 Scotts Manufacturing Directory records
- 9 Ontario Spills records
- 1 Water Well Information System record

The above noted records would not likely have an adverse impact on the subject site due to the nature of the records and the location and separation distance relative to the subject property.

3.7 PREVIOUS REPORTS

No previous reports were available for review.

4. SITE INSPECTION FOR ENVIRONMENTAL LIABILITIES

4.1 HAZARDOUS MATERIALS IN CONNECTION WITH IDENTIFIED USES

No hazardous materials were noted to be present on the property on the day of inspection.

4.2 SUBSTANCE CONTAINERS

No substance containers were observed on the property on the day of inspection.

4.3 STORAGE TANKS

No vent or fill pipes normally associated with underground storage tanks, nor any above ground storage tanks were noted on site on the day of inspection.

4.4 POLYCHLORINATED BIPHENYLS (PCBs)

Lighting in the building is provided by fluorescent and incandescent light fixtures. The production and installation of PCB containing electrical equipment was banned in 1980 and since the building was constructed in the 1970s, it is possible that some of the electrical equipment in the building contain PCBs; however, it is likely that many of the fixtures would have been changed as part of on-going maintenance.

4.5 WASTE MANAGEMENT

No evidence of waste storage or burial was apparent on the day of inspection.

4.6 ASBESTOS

No evidence of asbestos or asbestos containing materials was observed to be present on the day of inspection.

4.7 BILL 208 - DESIGNATED SUBSTANCES

A brief review of the site's components was conducted to assess the potential for designated substances identified in Bill 208, Article 18 (a). The presence of PCBs and asbestos containing materials were addressed in Section 4.4 and Section 4.6, respectively. The following comments related to the potential for the presence of other designated substances on the property are offered:

- acrylonitrile - potential not observed
- arsenic - potential not observed
- benzene - potential not observed
- coke oven emissions - potential not observed
- ethylene oxide - potential not observed
- isocyanates - potential not observed
- lead – potential not observed
- mercury - potential not observed
- silica – potential not observed
- vinyl chloride - potential not observed

Generally, there is no reason to suspect that the above substances were present in sufficient quantities to exceed Ministry of Labour exposure limits.

4.8 RECONNAISSANCE OF ADJACENT PROPERTIES

The vicinity properties have been occupied by residential and commercial/light industrial properties since the first development of the area in the early-1970s. No obvious environmental issues were identified on the adjacent properties based on visual inspection from publicly accessible areas.

4.9 POTENTIAL FOR MIGRATION OF RELEASED MATERIALS

The general area is comprised of impermeable clayey silt till as noted in Section 3.1 and consequently, the groundwater is not overly susceptible to contamination from surface spills. Locally, it is inferred that shallow groundwater likely flows in a southwesterly direction toward Little Etobicoke Creek and it is unlikely that the current commercial land use of the upgradient properties to the northeast would have an adverse environmental impact on the subject property.

4.10 NOISE AND VIBRATION

The levels of noise and vibration at the time of inspection were noted to be likely suitable for a residential area.

4.11 CHLOROFLUOROCARBONS AND HYDROCHLOROFLUOROCARBONS

No air conditioning systems that could contain ozone depleting substances were observed on site on the day of inspection.

4.12 AIR EMISSIONS

Air discharges from the building consist of heating ventilation and unlikely to be an environmental hazard. An environmental compliance approval is required under Ontario Regulation 346/12 if the combined nameplate capacity of the combustion equipment is more than 1.58 million kilojoules per hour where the equipment has been constructed, altered, extended, or replaced after June 30, 1988. An environmental compliance approval may be required; however, the presence of an environmental compliance approval is a matter of environmental compliance and would not have an impact on the environmental condition of the property.

4.13 UREA FORMALDEHYDE FOAM INSULATION (UFFI)

UFFI, a mixture of urea-formaldehyde resin, a foaming agent, and compressed air, was developed and used as an improved means of insulating buildings in the mid-1970s until 1980. Health implications from UFFI resulted in a ban of its use in 1980. However, no evidence of UFFI was observed on the property.

4.14 LEAD-BASED PAINT

Paints made before 1950 contained large amounts of lead. Currently, under Canada's Hazardous Products Act and Regulations, lead levels in indoor paint were limited to 0.5 percent by weight in 1980 and there is little concern for lead levels in paints in structures built after that date. All consumer paints produced in Canada after 1992 are virtually lead-free. There was no evidence of lead-based paints having been present on the property.

4.15 MOULD

A comprehensive intrusive inspection for mould was not performed as part of this Phase I ESA; however, no visual evidence of mould amplification sites were noted during our inspection visit.

4.16 FILL MATERIALS

No evidence of significant fill material was apparent on the day of inspection.

5. SUMMARY OF FINDINGS AND CONCLUSIONS

- (i) The property is located in an area of primarily commercial/light industrial land use on the south side of Eglinton Avenue East, west of Dixie Road at the termination of Maingate Drive in Mississauga, Ontario. The legal description of the property is "*Part of Lots 7 and 8, Concession 2, NDS, City of Mississauga, Municipality of Peel, Ontario*".
- (ii) The subject property measures approximately 1,855.98 m² (square metres) with a single family dwelling situated centrally on the site. The area surrounding the building is paved at the north side, gravel covered to the east with a grassed yard at the rear. A paved entranceway provides access to the property from Eglinton Avenue East at the north side of the site. The property boundaries are defined by: a municipal sidewalk then Eglinton Avenue East to the north, residential houses to the east and west, and vacant land then a commercial/light industrial complex to the south. The vicinity area is municipally serviced for water and sewers and any surface spills would likely be directed to the municipal sewer system with minimal impact on the property.
- (iii) The subject property is improved by a two-storey dwelling with one basement level. The building is heated by a natural gas-fired furnace located in the basement of the house. Interior finishes were comprised of carpet, hardwood or ceramic floor tiles with drywall or plaster walls. A single car garage is present south of the house.
- (iv) The subject property is used for residential purposes.
- (v) Aerial photographs from 1954, 1960, 1965, 1970, 1975, 1980, 1989, 2000, 2005, and 2010 were reviewed for the vicinity area from the City of Mississauga and Toronto Archives websites. In the 1954 photograph, the subject and vicinity properties were agricultural and no structures were present on the subject site. The dwelling was visible on the site from 1960 through to the 2010 photographs. In the 1960 to 1975 photographs, the properties to the south were undeveloped agricultural land. The commercial/industrial buildings to the north were visible in the 1975 and later photographs. The property to the west was vacant in all the photographs, and the house to the east was visible in the 1960 and later photographs.

- (vi) A search of the Suburban Toronto City Directories was undertaken dating from 2000 back to 1969 when the vicinity area was first listed. A residential house was listed at the subject property between 1977 and 1984. In 1989, Falconview Realty was listed at the subject site and then from 1994 to 2000 a residential tenant was listed.
- (vii) The adjacent properties were listed as residences and commercial/light industrial facilities similar to the current occupants since the early 1970s as noted below:
- **east:** Madessin General Contractors was listed from 1984 to 2000. A residential tenant was then listed since 1977.
 - **south:** A commercial/light industrial complex was listed at 1105 to 1135 Crestlawn Drive since 1990.
 - **west:** A residential house was listed at 1094 Eglinton Avenue East since 1977 until 1984. A demolition permit was issued for a residential dwelling in 1986.
 - **north:** 5015 and 5030 Maingate Drive were listed as commercial plazas with tenants similar to the current occupants since 1977.
- (viii) Building permits for the subject site were reviewed on the City of Mississauga No hazardous materials were noted to be present on the property on the day of inspection.
- (ix) website. Three permits were listed as follows:
- 1972, a pool and fence storage permit
 - 1987, a cancelled permit for a new industrial building
 - 2003, a sewer conversion permit for a detached dwelling
- (x) No substance containers were observed on the property on the day of inspection.
- (xi) No vent or fill pipes normally associated with underground storage tanks, nor any above ground storage tanks were noted on site on the day of inspection.
- (xii) It is possible that some of the electrical equipment in the building contain PCBs; however, it is likely that many of the fixtures would have been changed as part of on-going maintenance.
- (xiii) No evidence of waste storage or burial was apparent on the day of inspection.
- (xiv) No evidence of asbestos or asbestos containing materials was observed to be present on the day of inspection.
- (xv) The general area is comprised of impermeable clayey silt till and consequently, the groundwater is not overly susceptible to contamination from surface spills. Locally, it is inferred that shallow groundwater likely flows in a southwesterly direction

toward Little Etobicoke Creek and it is unlikely that the current commercial land use of the upgradient properties to the northeast would have an adverse environmental impact on the subject property.

In summary, the Phase I environmental assessment did not reveal any significant environmental concerns that would impact on or restrict the current use or redevelopment of the property and no further investigation is required.

6. LIMITATIONS

TRY Environmental Services Inc., has performed this site assessment in accordance with local generally accepted professional practices and procedures at the time of the assessment within the scope of Phase I ESAs specified by the CMHC and CSA. As such, the assessment does not include any sampling or testing for potential contaminants such as asbestos, PCBs, radon gas, or airborne pollutants, etc. Occupancy use, codes, rules, and procedures change rapidly with time in the environmental engineering field and the reader is advised to update the findings and recommendations on a regular basis. The report herein comprises a statement of professional opinion based on visual observation only and the reader is advised that visual observation is not effective in determining **all** conditions that affect environmental compliance. These services are not subject to any express or implied warranties and none should be inferred.

This report was prepared by TRY Environmental Services Inc., for Ali Motors, and their designated representatives. The material in it reflects the judgment of TRY Environmental Service Inc., in light of the information available to it at the time of preparation. Any use which a Third Party makes of this report, or any reliance on decisions to be made based on it, are the responsibility of such Third Parties. TRY Environmental Services Inc., accepts no responsibility for damages, if any, suffered by any Third Party as a result of decisions made or actions based on this report.

TRY Environmental Services Inc., reserves the right to modify our conclusions in the event that regulatory responses are received after issuance of this report that indicate environmental issues have been identified to be present.

7. CONSULTANT QUALIFICATIONS

TRY Environmental Services Inc., is an incorporated company providing consulting engineering services in the environmental field. The company is registered in Ontario and operates under a Certificate of Authorization #1659697 from the Professional Engineers Ontario. The firm carries professional liability insurance for environmental consultants and Mr. Robert C. Ostry M.A., P. Eng., with 35 years of applied experience is the senior environmental consultant and principal of the firm.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial **AAGR**

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial **AGR**

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2016

Abandoned Mine Information System:

Provincial **AMIS**

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1880-Nov 2016

Anderson's Waste Disposal Sites:

Private **ANDR**

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1880 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1880s-Present

Automobile Wrecking & Supplies:

Private **AUWR**

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: Oct 31, 2016

Borehole:

Provincial **BORE**

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval:

Provincial **CA**

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CoFA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks:

Provincial CFOT

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: Oct 31, 2016

Chemical Register:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: Oct 31, 2016

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 31, 2012

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory."

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jan 2017

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jan 2017

Drill Hole Database:

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1986-Aug 2015

Environmental Activity and Sector Registry:

Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Nov 2016

Environmental Registry:

Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water, these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jan 2017

Environmental Compliance Approval:

Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Nov 2016

Environmental Effects Monitoring:

Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 2016

Environmental Issues Inventory System:

Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety, and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial EMHE

The Emergency Management Historical Event data class will store the locations of historical occurrences of emergency events. Events captured will include those assigned to the Ministry of Natural Resources by Order-in-Council (OIC) under the Emergency Management and Civil Protection Act as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance; Continuity of Operations Event; Other Requested Assistance.

Government Publication Date: May 31, 2014

List of TSSA Expired Facilities:

Provincial EXP

This is a list of all expired facilities that fall under the TSSA (TSSA Act & Safety Regulations), including the six regulations that exist under the Fuels Safety Division. It will include facilities such as private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. These tanks have been removed and automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Oct 31, 2016

Federal Convictions:

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: June 2000-Aug 2016

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sept 2003

Fuel Storage Tank:Provincial **FST**

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: Oct 31, 2016

Fuel Storage Tank - Historic:Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Sep 2016

Greenhouse Gas Emissions from Large Facilities:Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013 - Dec 2014

TSSA Historic Incidents:Provincial **HINC**

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents:Provincial **INC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: Oct 31, 2016

Landfill Inventory Management Ontario:Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Dec 31, 2013

Canadian Mine Locations:Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1996-2009*

Mineral Occurrences:Provincial **MNR**

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2016

National Analysis of Trends in Emergencies System (NATES):Federal **NATE**

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:Provincial **NCPL**

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2014

National Defense & Canadian Forces Fuel Tanks:Federal **NDFT**

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:Federal **NDSP**

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Aug 2010

National Defence & Canadian Forces Waste Disposal Sites:Federal **NDWD**

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Wells:Federal **NEBW**

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-2014

Oil and Gas Wells:

Private OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Jan 2017

Ontario Oil and Gas Wells:

Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSRL Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Oct 2016

Inventory of PCB Storage Sites:

Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jan 2017

Canadian Pulp and Paper:

Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009

Parks Canada Fuel Storage Tanks:

Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Oct 2016

TSSA Pipeline Incidents:

Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: Oct 31, 2016

National Energy Board Pipeline Incidents:

Federal PIPELINE INCIDENTS

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008 - Dec 2016

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jan 2017

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2013

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O. Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2016

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: Oct 31, 2016

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:Provincial **SPL**

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Dec 2016

Wastewater Discharger Registration Database:Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-2014

Anderson's Storage Tanks:Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Jan 2015

TSSA Variances for Abandonment of Underground Storage Tanks:Provincial **VAR**

The TSSA, under the Liquid Fuels Handling Code and the Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, you may apply to seek a variance from this code requirement. This is a list of all variances granted for abandoned tanks.

Government Publication Date: Oct 31, 2016

Waste Disposal Sites - MOE CA Inventory:Provincial **WDS**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERI's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: 1970-Nov 2016

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERI's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:Provincial **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30, 2016

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
