### **Purpose of the Shadow Study**

A Shadow Study is required in support of this development application. Mississauga's terms of reference for Shadow Studies require development proponents to meet five criteria for the dates of June 21, September 21, and December 21.

### **Criteria 1: Ensure adequate sunlight on residential private outdoor amenity spaces**

This criterion is met if there is shadow impact for no more than two consecutive hourly test times within the space between the exterior wall of the dwelling that abuts the amenity space and the line of impact assessment on June 21 and September 21.

Properties to the north and west are zoned C4 – Mainstreet commercial. The zoning essentially allows 100 % lot coverage to a height of 3 stories or 12.5 m to the top of a flat roof. Given the C4 zoning and the as-of right massing for these properties, the criteria does not apply. The property to the east, 65 Port Street is zoned RA2-33 – the proposed development meets the criteria with respect to this property.

### **Criteria 2: Ensure adequate sunlight on communal outdoor amenity areas including, children's play areas, school yards, tot lots, and park features such as sandboxes, wading pools etc., and outdoor amenity areas used by seniors and those associated with commercial and employment areas during spring, summer, fall and winter.**

This criterion, which applies to public amenity areas that are part of the proposed development, is met if the sun access factor is at least 50% or 0.5 on June 21, September 21, and December 21.

The building's outdoor amenity space is located in the south east corner of the property. The attached analysis demonstrates that the outdoor amenity space has a sun access factor of .63 in June, .70 in September and .75 in December, therefore the criteria is met.

### **Criteria 3: Ensure adequate sunlight on the public realm including sidewalks, open spaces, parks and plazas to maximize their use during the shoulder seasons (spring and fall).**

This criterion is met if there is no incremental shade from the proposed development at 9:12 a.m., 10:12a.m. and 11:12 a.m., and at 3:12 p.m., 4:12 p.m. and 5:12 p.m. on low and medium density residential streets; at 12:12 p.m., 1:12 p.m. and 2:12 p.m., and three consecutive times either 9:12 a.m., 10:12 a.m. and 11:12 a.m. or 3:12 p.m., 4:12 p.m. and 5:12 p.m. on mixed use, commercial, employment, and high density residential streets; and provides a sun access factor of at least 50% on public open spaces, parks and plazas on September 21.

The waterfront trail/park to the south is clear of shadow from 9:12am to approximately 4:12pm when a minimal shadow impact begins to appear on the park.

### **Criteria 4: Ensure adequate sunlight on turf and flower gardens in public parks.**

This criterion is met if full sun is provided on any 7 test times on September 21, from 1.5 hours after sunrise to 1.5 hours before sunset.

The shadow study diagrams indicate that the criteria is met as the waterfront trail/park is clear of shadow from sun 8:35 am to approximately 4:12 pm.

### **Criteria 5: Ensure adequate sunlight on building faces to allow for the possibility of using solar energy.**

This criterion is met if there is shadow impact for no more than two consecutive hourly test times in the "No Impact Zone" i.e. the space between the front, rear and exterior side walls of the adjacent low-rise residential buildings and the respective lines of impact assessment.

As mentioned in Criteria 1, properties to the north and west are zoned C4 and therefore this criteria does not apply. The criteria does not apply to the property to the east, 65 Port Street, as the building is 6 storeys in height.
