Recommendation Report (All Wards)

A By-law to repeal By-law 251-13 Construction, Demolition and Change of Use Permits, inspections and related matters (The Building By-law) and adopt a new Building By-law.

PUBLIC MEETING

Recommendation

1. That By-law 251-13 be repealed.
2. A new By-law be enacted respecting construction, demolition and change of use permit, inspections and related matters (The Building By-law) in accordance with Appendix 1 of the report dated October 28th, 2019 from the Commissioner of Planning and Building be approved.

Report Highlights

- The Building Code Act authorizes Council to administer the Act and determine an appropriate fee structure to maximize cost recovery in providing building permit and inspection services.
- The proposed increases in permit fees will maximize cost recovery considering operating cost increases associated with delivering the building permit service.
- Building permit fees will be increased by City adopted inflation rate of 2.6% 2020 and 3.0% in 2021 and 3.0% in 2022
- Fees will be reviewed in 2020 as a part of comprehensive review conducted every 5 years by an external consultant.
- Administrative changes will be reflected in the proposed By-law to better address the implementation of ePlans, manage inactive applications and permits, reduce the financial impact of abandoned applications, and address the implementation of the Demolition Control By-law 45-2019 (or its successor).

Background

The construction, renovation, demolition and change of use of buildings are regulated through the Building Code Act, 1992 (BCA) and the Building Code. The BCA and the Code are enforced locally, through municipalities. Municipal building divisions review building permit applications, issue permits, inspect buildings under construction, and take enforcement action where contraventions are found.

Ontario's Building Code Act, 1992 sets the regulatory framework for the construction, renovation and change of use of buildings. It sets out or authorizes technical standards; administrative procedures; enforcement powers; and mechanisms for dispute of appeals and new product and system approvals.

Section 7. (1) of the Building Code Act, states that the council of a municipality may pass a by-law (The Building By-law) applicable to the matters for which, and in the area in which, the municipality has jurisdiction for the enforcement of the Act.

Subsection 7. (1)(c) of the Building Code Act authorizes Council to require the payment of fees on permit applications. The responsibility rests with Council to determine an appropriate fee structure for all classes of building permits.

Prior to passing of a By-law to introduce or change a fee imposed for permits or for the issuance of permits, the municipality must hold at least one public meeting at which any person who attends has an opportunity to make representations with respect to the matter.

In accordance with Part IX of the Building By-law, a 21-day notice must be provided prior to the public meeting to any persons and organizations that requested notice in the last five years. Upon discussions with the Office of the City Clerk, no persons or organizations has requested notice and no additional notice is required other than this item being listed on the Committee's agenda.

Comments

A scan of building permit fees of neighbouring municipalities shows Mississauga at the higher end of the scale. However, these rates were established in 2016 following a comprehensive review of permits fee and cost recovery by Watson Economists. The report revealed that we were under recovering on our high volume application types (residential and non-residential alterations).

In response, fee rates for our alteration type permits were increased. Fee rates for residential apartment/condos were also increased to offset the under recovery of alteration permit types.

The report also identified a need to establish and maintain a building permit revenue reserve at 2 times the annual direct operating costs of the Building service. The current reserve is approximately 50% of that target.

A comprehensive review of fees and cost will once again be conducted in 2020 by an external consultant to validate cost recovery, confirm higher recovery rates for alteration type permits, and provide a comparison across like municipalities.

In the interim, staff recommends an increase in building flat rate fees and fee rates of 2.6% 2020 and 3.0% in 2021 and 3.0% in 2022. These rate increases are consistent with the previous rate increases endorsed in 2016. The increases in building permit fees reflect the increase in operating costs associated with delivering the building permit service. The fee increases will maintain cost recovery, provide sufficient staff to deliver the service, and provide for annual maintenance contribution at the same rate to the Building Permit Revenue Reserve.

Financial Impact

The proposed fee rate increases and incremental increases annually will result in a continuation of full cost recovery for services prescribed by the *Building Code Act*. In addition, the proposed fee increases will provide for contributions to the Building Permit Reserve.

Conclusion

The proposed amending Building By-law is in compliance with the Building Code Act, 1992, as amended, and in compliance with the Ontario Building Code, Ontario Regulation 332/12, as amended.
