Not Listed

You don't need a heritage permit and can continue along in your process.

Listed

Listed properties are properties believed to be of cultural heritage value or interest that have not been designated under the Ontario Heritage Act. If the owner of a listed property applies for a City building permit and their property is listed on the City's Heritage Register, it will be flagged in the building or development application process. Building permits require review from Heritage Planning. Should the application include demolition, it would require a heritage permit and 60 days notice to Council. The 60 days is legislated by the Province of Ontario to allow time for Council to consider heritage designation.

Designated

Designated properties are protected by a heritage designation by-law on title. If a property is designated under the Ontario Heritage Act, a heritage permit is needed to make any changes to the protected characteristics of the property. Heritage designated properties are eligible for the City's annual matching grant program; this grant helps owners to conserve, repair and/or restore heritage characteristics.
